# Introduction

OhioHealth is a nationally recognized, not-for-profit, system of faith-based hospitals and healthcare organizations serving 50 Ohio counties. All OhioHealth entities are connected by (a) a mission “to improve the health of those we serve”; (b) core values of compassion, excellence, stewardship, integrity, and inclusion; and (c) cardinal value of “we honor the dignity and worth of each person”. OhioHealth’s vision is “to provide exceptional care for all through experiences that earn a lifetime of trust”. **Table 1** shows the 16 OhioHealth member hospitals that are in 12 Ohio counties and serves patients residing in 50 of the 88 counties in Ohio.

OhioHealth has been recognized nationally for its world-class healthcare services. OhioHealth has been recognized by Fortune as one of the “100 Best Companies to Work For” from 2007-2021. (OhioHealth 2024). Great Place to Work® and PEOPLE magazine have honored OhioHealth as one of the 2021 PEOPLE Companies that Care® (OhioHealth 2024). In 2020, four OhioHealth hospitals, namely, Riverside Methodist Hospital, Grant Medical Center, Doctors Hospital and Dublin Methodist Hospital were named a 2020 LGBTQ Healthcare Equality Top Performer based on the 2020 Healthcare Equality Index (HEI) administered by the Human Rights Campaign (HRC). In 2020, OhioHealth was recognized as Great Place to Work – Certified™ based on the Great Place to Work® Trust Index™ survey.

In February 2021, the OhioHealth Inclusion Pledge was adopted throughout the health system. Each OhioHealth employee becomes a part of a culture that cares; one that supports one another; and honors the dignity and worth of each person. OhioHealth is committed to ensuring that the organization reflects the rich diversity of the communities we serve. We respect, embrace, and derive strength from the ways that we are similar and the ways that we are different.

OhioHealth is dedicated to serving communities through its community benefit. In Fiscal Year 2023, OhioHealth provided a total \$468 million in Community Benefit, including \$107.7 million in charity care, \$254.7 million in net cost of Medicaid programs, \$67.2 million in net cost of medical education, \$0.9 million in subsidized health services, \$10.8 million toward community health services, \$25.7 million in cash and in-kind contributions, and \$1 million for research.

OhioHealth Marion General Hospital is a 250-bed hospital that has provided quality healthcare to the north central Ohio communities since 1920. The hospital offers a comprehensive mix of inpatient and outpatient healthcare services, including 24/7 stroke and neurological services, advanced heart and vascular surgeries, orthopedic and sports medicine, treatment, and comprehensive cancer care. OhioHealth Marion General Hospital has healthcare expertise in neurology, heart and vascular, orthopedics and cancer.

OhioHealth Marion General Hospital is part of the OhioHealth Stroke Network and certified by the Joint Commission as a Primary Stroke Center. OhioHealth Marion General Hospital serves as the north central Ohio's Referral Center for stroke and neurological care. Patients can stay close to home for expert and compassionate care, with neurologists in Marion, Ohio, who provide inpatient and outpatient services.

OhioHealth Marion General Hospital provides exceptional heart and vascular care locally to patients, with the latest technology and advanced procedures. Patients can get complex evaluation and care without having to travel. Most importantly, OhioHealth Marion General Hospital provide prevention and wellness programs to promote heart health, including nutrition counseling, smoking cessation, and cardiac rehabilitation.

OhioHealth Marion General Hospital offers a full range of orthopedic and surgical services with access to private rooms and the latest technology. Patients have access to physical therapy, orthotics, imaging, emergency care. The multidisciplinary team of physicians, nurses and specialists who care for everything from sprains to total joint replacements.

OhioHealth Marion General Hospital's cancer experts provide innovative, comprehensive care for every patient. You will be supported by a collaborative, multidisciplinary care team at every step of your journey. Cancer patients also have access to unmatched resources, technology, patient navigators, oncology rehabilitation, nutrition guidance, and supportive care.

OhioHealth Marion General Hospital is the largest maternity program in north central Ohio. The OhioHealth Marion General Hospital Maternity Center is staffed by board-certified obstetricians, pediatricians, anesthesiologists, and highly skilled nurses who provide exceptional care for mothers and their babies. The newly remodeled unit features all private rooms, two new nurses' stations with safety monitoring technology, badge access to keep moms and babies safe, labor and delivery rooms with new infant warmers, a larger c-section room, and a Level 2 special-care nursery. OhioHealth partners with Nationwide Children's Hospital and provide a neonatologist onsite for specialized care. OhioHealth has maternal-fetal medicine experts who take care of high-risk pregnancies in collaboration with the woman's obstetrics and gynecology (OB/GYN) doctor.

OhioHealth Marion General Hospital received various awards and recognitions related to excellent quality of patient care and use of technology to further improve patient care services.

- a. **Accreditation by The Joint Commission** – The Joint Commission has accredited Marion General Hospital's hospital and home care facilities. The OhioHealth Marion General Hospital has advanced certification as a Primary Stroke Center. Various facilities affiliated with OhioHealth Marion General Hospital are also accredited by The Joint Commission (The Joint Commission, 2024).
  - + **OhioHealth Marion General Hospital** – located at 1000 McKinley Park Drive, Marion, Ohio 43302.
  - + **OhioHealth Marion Medical Campus** – located at 1050 Delaware Avenue, Marion, Ohio 43302.

- **Skin Cancer** – provides skin cancer screening and treatment.
- **Survivorship and supportive care** – personalized support to cancer patients through individualized education, symptom management, prevention, and wellness.

**C – 2.2. OhioHealth Cardiac Rehabilitation** – a 12-week program to help patients with had previous heart events return to full and active life while improving cardiovascular health in the long-term. The cardiac rehabilitation program also prevents another heart event.

Patients with the following conditions in the past year can benefit from cardiac rehabilitation:

- Heart attack (myocardial infarction).
- Acute coronary syndrome (ACS).
- Chronic stable angina.
- Recent cardiac procedure such as angioplasty or stent.
- Coronary Artery Bypass Surgery (CABG).

- Heart valve surgery.
- Heart failure.

The OhioHealth Cardiac Rehabilitation program include but not limited to the following services:

- Nutrition planning.
- Supervised exercise program.
- Tobacco cessation program.
- Medical weight management.
- Heart disease prevention clinics.
- Support groups.
- Stress management, lifestyle, and health responsibility coaching.
- Engagement of patient's family and caregivers to provide support and motivation.
- Development of a personalized, ongoing fitness program to continue their healthy living and exercise program.

**C – 2.3. OhioHealth Diabetes Care** – OhioHealth's personalized diabetes treatment programs can help you achieve your best level of health and maintain an active lifestyle. The OhioHealth Diabetes Care team provide the most current information and resources for self-management of Type 1, Type 2, and gestational diabetes. Patients, families, and their caregivers are educated about diabetes and development of diabetes self-management skills in individual or group sessions.

The multidisciplinary diabetes care team include but not limited to:

- Certified diabetes educators.
- Nurses.
- Dietitians.
- Exercise physiologists.
- Pharmacists.

The OhioHealth Diabetes Care program include activities such as but not limited to:

- Comprehensive education class series that includes individual assessments with a nurse educator and dietitian.
- Individual consultation with a nurse educator and/or dietitian for specific needs.
- Free support group meetings every other month.

Examples of diabetes care-related topics discussed with a nurse and/or dietitian include:

- Why do you need to manage diabetes?
- How do you safely manage diabetes?
- How do you prevent complications of diabetes?
- How do you use a glucose meter and take medications?
- How do you understand and deal with the emotional aspects of diabetes?
- How do you make behavior changes that promote a healthy lifestyle?
- Why do you need to manage diabetes?
- How do you safely manage diabetes?
- How do you prevent complications of diabetes?
- How do you use a glucose meter and take medications?
- How do you understand and deal with the emotional aspects of diabetes?
- How do you make behavior changes that promote a healthy lifestyle?

**C – 2.4. OhioHealth Heart and Vascular Services** – The OhioHealth cardiovascular specialists provides patients with (a) access to the latest treatments and clinical research trials; (b) access to a patient-centered multidisciplinary team; (c) access to excellent quality care available locally; and (d) assurance of better outcomes that are consistently above national benchmarks.

Examples of the OhioHealth Heart and Vascular programs include:

- **OhioHealth cardiac imaging tests** – give physicians an inside view of the heart and vascular system. Cardiac imaging helps physicians evaluate the structure, function, or damage to the heart, as well as plan and guide catheter-based procedures. Using the images gathered from the tests, our cardiac imaging physicians work together with our other cardiovascular experts to make an accurate diagnosis and determine the best treatment for you. OhioHealth uses advanced cardiac imaging interventions such as:
  - + **Cardiovascular Magnetic Resonance Imaging (CVMR)** – an advanced, noninvasive cardiac imaging technique that produces high quality, detailed images that help determine your diagnosis and treatment. CVMR is an advanced imaging used to analyze the structure of the heart.
  - + **Calcium Coronary Scoring** – an advanced, low radiation heart imaging for people older than age 40. The heart scan screens for early plaque in arteries. Calcium Coronary Scoring is useful for patients with a family history of heart disease or at risk for heart disease, especially those patients with high blood pressure, high cholesterol, diabetes and other diseases or behaviors that lead to heart disease).
  - + **Cardiac Positron Emission Tomography (Cardiac PET)** – an advanced, noninvasive test that provides detailed images of the heart and associated blood flow. Cardiac PET is used to diagnose coronary artery disease and detect areas of low blood flow in the heart. The Cardiac PET assesses heart function and damage after a heart event. As part of the test, a small amount of radioactive solution is injected into the blood stream and a heart scan is taken. OhioHealth physicians use these highly detailed images of the heart and blood flow.

- + **Cardiovascular Computed Tomography Angiography (CCTA)** – aims to determine abnormalities in blood flow, abnormality of the arteries due to plaque buildup, and overall function of the heart. Plaque buildup may be due to accumulation of fat, cholesterol, and calcium.
- **Echocardiogram** – uses sound waves to create pictures of the heart. Echocardiogram shows the image of the heart while it is beating and shows image of the heart valves and other structures. It is more commonly called Transthoracic echocardiogram (Medline Plus, 2023).
- **Electrocardiogram** – the first test to determine if a person has a heart condition. Electrocardiogram can determine the following: (a) how fast your heart is beating; (b) steady or irregular rhythm of the heartbeat; and (c) strength and timing of electrical signals passing through each part of the heart.
- **Exercise and nuclear stress testing** – takes pictures of the heart while a patient is exercising. A patient is injected with a tracer, which is a radioactive substance.
- **Nuclear imaging** – uses a small amount of radioactive material to create detailed pictures of the heart.
- **Transesophageal echocardiogram (TEE)** – a probe with an ultrasound transducer is inserted into the throat. TEE can determine inflammation of the heart, blood clots, and other abnormal structures.
- **Cardiovascular diagnostic testing** – involves blood tests and imaging to determine blood flow, heart rhythm, heart valves and chambers, and presence of tumors or heart structure abnormalities.
- **Cardiac Rehabilitation** – The OhioHealth Cardiac Rehabilitation team helps patients who were affected with: (a) heart attack/myocardial infarction; (b) acute coronary syndrome; (c) chronic stable angina; (d) recent cardiac procedure such as angioplasty or stent; (e) Coronary Artery Bypass Grafting (CABG) surgery; (f) heart valve surgery; and (g) heart failure. OhioHealth offers the following services: Our experienced team of clinical cardiac rehabilitation specialists will teach you how to make changes in your life to improve your heart health.  
  
Depending on patient's condition, the cardiac rehabilitation program may include: (a) nutrition planning; (b) supervised exercise program; (c) tobacco cessation program; (d) medical weight management; (e) heart disease prevention clinics; (f) support groups; (g) stress management; and (h) lifestyle and health responsibility coaching.
- **Cardiothoracic Surgery** – OhioHealth's cardiothoracic surgeons perform heart surgeries such as but not limited to: (a) Coronary Artery Bypass Grafts (CABG; bypass surgery); (b) mitral and aortic valve repair and replacement; (c) surgical ablation for atrial fibrillation; (d) atrial and ventricular septal defect repairs; (e) thoracic aneurysm repair; (f) aortic reconstruction with endovascular and open techniques; and (g) left ventricular assist device (LVAD) implantation.
- **Clinical Cardiology (Women's Heart Health Services)** – focus on chest pain, irregular heartbeats, poor circulation, heart failure, heart valve problems. Cardiovascular disease in women is affected by age, weight, and gender.

OhioHealth has offered prevention programs for women such as but not limited to:

- + **Pregnancy Predicts Risk Program** – This program is designed to reduce future heart disease risk in women who experience hypertension (high blood pressure), preeclampsia and diabetes during pregnancy.
- + **Emergent Care** – We educate EMS and Emergency Department (ED) teams throughout the region about how a heart attack presents differently in women and have defined protocols for when to administer an electrocardiogram (EKG).
- + **Peripheral Arterial Disease** – OhioHealth educates the community and primary care physicians about the symptoms of peripheral arterial disease (PAD), which is underdiagnosed and undertreated in women.
- **Clinical Cardiology (Sports Cardiology)** – It has been recognized that an underlying heart condition can stop athletes in their tracks and could even be fatal. Typically caused by a rhythm disturbance, a structural abnormality or a problem with coronary arteries, these conditions may not cause any symptoms before a significant heart event occurs. OhioHealth offers heart screenings for student athletes, active teen and adults, to evaluate for underlying heart conditions that could put them at risk while competing or training. The assessment can be performed beginning at age 14. The screening is non-invasive and involves two simple heart tests: (a) electrocardiogram (EKG); and (b) focused echocardiogram (a painless ultrasound of the heart). OhioHealth's sports cardiologists will evaluate and interpret the test results and then mail the participant a written report within two business days. Most importantly, OhioHealth's sports cardiologists will also share results with the designated primary care physician or pediatrician.
- **Clinical Cardiology (Cardio-Oncology)** – OhioHealth's cardiologists offer prevention, early detection and prompt treatment of side effects of cancer treatments. OhioHealth's dedicated team of cardiologists works closely with patient's oncologists to help prevent, detect, and treat possible cardiac side effects related to cancer treatments. Additionally, OhioHealth cardiologists' trusted experience in managing pre-existing cardiac conditions and optimizing cardiovascular risks in patients undergoing cancer treatment.
- **Heart and Vascular Electrophysiology** – OhioHealth's electrophysiologists customize treatment to unique and complex needs of patients with abnormal heart rhythms (arrhythmias or dysrhythmias). Natural electrical impulses in the body cause contractions in the heart to keep blood flow. In some patients, heart rhythm can get out of sync causing a myriad of symptoms from dizziness and fainting to blood clots and strokes. OhioHealth's cardiologists are experts at diagnosing heart rhythm disorders and often collaborate with OhioHealth's heart failure specialists, Cardiovascular surgeons identify the most appropriate treatment for specific heart concerns. Treatments for arrhythmia disorders are often complex requiring a combination of drugs and interventions and different for each patient.

OhioHealth treats various heart rhythm conditions, such as but not limited to:

- + Atrial fibrillation.
- + Bradyarrhythmia (slow heart rate).
- + Heart failure (cardiac resynchronization devices).
- + Supraventricular tachycardia.
- + Ventricular tachycardia and fibrillation.
- + Premature ventricular contractions (PVC).

OhioHealth's electrophysiology treatments treat heart rhythms through various interventions, such as but not limited to:

- + **New Cardiac Mapping Technology** – OhioHealth's electrophysiologists were among the first in the state to begin using cardiac mapping for more accurate diagnosis and successful treatment of complex cardiac arrhythmias. The system generates a 3D map of the heart's electrical function that helps physicians more precisely target the areas that need to be ablated.
- + **Ablation** – Catheter ablation is a minimally invasive technique used to eliminate the abnormal heart tissue responsible for an arrhythmia. Using advanced imaging and a tiny incision, a catheter is threaded through blood vessels to the heart to deliver ablation energy to eliminate the heart tissue responsible for the arrhythmia.
- + **Implanted devices** – OhioHealth has vast experience implanting and managing cardiac devices. Access to a wide array of cardiac pacemakers, biventricular pacemakers, cardiac defibrillators and arrhythmia monitoring devices allows us to provide the right treatment for your specific condition. After patient's receive their implanted devices, OhioHealth provide regular monitoring and evaluation in our outpatient device clinics to ensure the device is functioning optimally.
- + **Atrial Fibrillation (AFib) Clinic** – At the OhioHealth Atrial Fibrillation Clinic, located in the OhioHealth Advanced Heart and Vascular Center at Riverside Methodist Hospital, OhioHealth's providers are experts at identifying and correcting heart rhythm disorders. These include atrial fibrillation, and caring for patients experiencing acute episodes of atrial fibrillation that request immediate evaluation or support. OhioHealth's Atrial Fibrillation (AFib) clinic may be reached at (614) 788-AFIB (2342).
- + **Other Interventions** – include (a) comprehensive diagnostic electrical studies; (b) left atrial appendage closure as an alternative to anticoagulant therapy; (c) non-invasive cardioversion procedures and tilt-table tests. Tilt-table tests determines how the body reacts to position changes to determine root causes of dizziness and fainting.
- + **Heart Failure** – Heart failure progresses over time. As your heart muscle weakens, it no longer has the strength to pump oxygen-rich blood through your body. It can lead to fatigue and shortness of breath, swelling, and kidney and liver damage. OhioHealth's heart failure specialists help patient manage heart failure by minimizing symptoms and prolonging life.
- + **Interventional Cardiology** – OhioHealth's interventional cardiologists are highly skilled at using small catheters, advanced imaging and tiny incisions to treat many conditions. These minimally invasive treatments lead to a quicker recovery, shorter hospital stays, better survival and improved quality of life for our patients. Some of the conditions we treat include: (a) myocardial infarction (heart attack); (b) coronary artery disease; (c) coronary artery chronic total occlusion (CTO); (d) structural heart/heart valve diseases; (e) heart failure; (f) vascular and peripheral vascular disease, including abdominal aortic aneurysm (AAA), (g) carotid artery disease and (h) peripheral artery disease (PAD).
- + **Structural Heart** – Age, injury or infection can alter the precise function of your heart. Our team of interventional cardiologists and surgeons take an equally precise approach to repair the damage and restore your health helps patients make a faster return to everyday life. OhioHealth structural heart specialists treat various conditions such as but not limited to (a) aortic stenosis; (b) aortic regurgitation; (c) chronic total occlusion; (d) hypertrophic obstructive cardiomyopathy; (e) left atrial appendage occlusion; (f) mitral regurgitation; (g) mitral stenosis; and (h) tricuspid regurgitation.

- **Vascular Disease** – The vascular system carries blood throughout the entire body, requiring a comprehensive approach to treating vascular disease. That is why our vascular team includes experts from five different specialties who collaborate to treat these complex conditions, including aortic aneurysms, carotid artery disease, venous disease and peripheral artery disease. By using a whole-body approach when evaluating and treating patients with vascular conditions, our patients have improved outcomes, even when it comes to the most difficult cases (

The vascular conditions (OhioHealth 2015-2024) that the healthcare team include but not limited to:

- + **Buerger's Disease** – also called “thromboangitis obliterans”. This rare disease affects arteries and veins in the arms and legs. Buerger's Disease causes blood vessels to become inflamed, swollen and blocked with blood clots, which eventually damages or destroys skin tissues. Virtually everyone diagnosed with Buerger's disease smokes or uses tobacco in other forms.
- + **Leg swelling** – Leg swelling, or edema, is a common condition that happens when fluid collects in small spaces around the tissues and structures of the leg. There are many different conditions that can cause leg swelling, including: vein disease, blood clots, medications, kidney problems and heart failure.
- + **Lymphedema** – buildup of fluid in the arms or legs after the network of vessels called the lymphatic system become damaged, resulting in swelling of the affected limb. It can happen in some people who have surgery or radiation treatment for cancer, as well as after an infection or injury to the limb, congenital abnormalities and underlying obesity.
- + **Raynaud's Disease** – This disease causes some areas of the body, such as fingers and toes to feel numb and cold in response to cold temperatures or stress. Treatment depends on its severity and whether you have other health conditions. For most people, Raynaud's disease isn't disabling, but it can affect your quality of life.
- + **Chronic Venous Disease (CVD)** – a common disorder of the leg veins that carry blood back to the heart. It can cause mild to severe symptoms, including a feeling of leg heaviness or aching, swelling and skin changes.
- + **Deep Vein Thrombosis (DVT)** – a blood clot that most commonly forms in the upper or lower extremities. It can result from orthopedic or major surgery, active cancer, or prolonged plane or car travel.
- + **Inferior Vena Cava (IVC) Filter Placement and Removal** – a medical device that prevents blood clots from traveling from the legs (DVT) to the lungs (PE). This procedure is done under local anesthesia, and commonly performed when a patient cannot be placed on a blood thinner due to the risk of bleeding.
- + **Lower Extremity Ulcers** – These open, non-healing sores on the legs, shin or ankle can occur when someone has severe chronic venous disease. The OhioHealth vascular specialists can take be very painful, ooze fluid and take months to heal.
- + **Pulmonary Embolism (PE)** – usually occurs when a blood clot from the leg travels to the lungs. The most common symptom is usually sudden or gradual shortness of breath. It can result from orthopedic or major surgery, active cancer, or prolonged plane or car travel.

- + **Thrombosis (blood clots)** – a semisolid mass that forms when certain parts of the blood (platelets, proteins, and cells) stick together and thicken the blood. Clotting is a helpful process that stops bleeding when it occurs at the site of injury and bleeding blood vessels. However, when it forms inside the blood vessel and compromises blood flow, it may lead to dangerous and life-threatening health issues.
- + **Varicose Veins** – occur when your veins become swollen and twisted from underlying vein disease, which mainly affects veins in the legs.
- + **Venous Thromboembolism** – a generic term for deep venous thrombosis (DVT) or pulmonary embolism (PE). Once one of these diagnoses are made it is important to take some form of blood thinner for a prescribed length of time.
- + **Abdominal Aortic Aneurysms (AAA)** – manifested by swelling in the aorta, the main artery that carries blood from the heart to the abdomen. While most aneurysms do not cause any problems, they can be serious if they are at risk of rupturing. Treatment options include surgery and lifestyle changes, like blood pressure control and tobacco cessation.
- + **Aortic Dissection** – tear in the layers of the wall of the aorta. Depending on the location of the dissection and the blockage of blood flow to other parts of the body, this type of aortic injury may be a surgical emergency or managed medically at first.
- + **Aortic Vessel Disease** – one of the most common forms of cardiovascular disease. This broad range of conditions which may require treatment, includes aneurysms, tears in the inner lining and ulcers.
- + **Carotid Artery Disease** – occurs when fatty deposits, called plaques, clog the blood vessels that deliver blood to the brain and head (carotid arteries). The clog increases the risk of stroke, which is a medical emergency.
- + **Carotid Atherosclerosis** – occurs when fatty deposits, called plaques, clog the blood vessel that deliver blood to the brain and head (carotid arteries).
- + **Critical Limb Ischemia (CLI)** – A severe blockage in the arteries of the lower extremities, which markedly reduces blood-flow.
- + **Lower extremity ulcers** – These open, non-healing sores on the legs, shin or ankle can occur when someone has severe chronic venous disease. They can take be very painful, ooze fluid and take months to heal.
- + **Mesenteric ischemia** – Mesenteric ischemia occurs when narrowed or blocked arteries restrict blood flow to your small intestine. Decreased blood flow can permanently damage the small intestine and may require immediate surgery.
- + **Peripheral Arterial Disease (PAD)** – Peripheral arterial disease is the process in which plaque, also known as atherosclerosis, builds up in the arteries. PAD usually occurs in people who already have documented plaque buildup in other parts of the body. Other risk factors include diabetes, high cholesterol, tobacco use and family history of plaque buildup.
- + **Renal Artery Stenosis** – the narrowing of one or more arteries that carry blood to your kidneys (renal arteries). Reduced blood flow to your kidneys may injure kidney tissue and increase blood pressure throughout your body. Treatment options include lifestyle changes, medication and a procedure to restore blood flow to the kidneys.

- + **Thoracic Aortic Aneurysms (TAA)** – a dilation or swelling of the aorta in the chest. It is a serious medical condition due to the risk of rupturing, which is a medical emergency. Treatment options include surgery and lifestyle changes, like blood pressure control and tobacco cessation.
- + **Transient Ischemic Attack (TIA)/Stroke** – When the artery to the brain has plaque that enters the bloodstream or becomes completely blocked, it can cause a transient ischemic attack (TIA) or stroke. Symptoms include numbness, weakness or paralysis in the face, arm or leg, and trouble with speech and thinking.
- + **Vision loss** – There are two types of vision loss. Amaurosis fugax is sudden temporary loss of vision in one of your eyes. Homonymous hemianopsia is vision loss in both eyes on one side.

**C – 2.5. OhioHealth Neuroscience programs and services** – offers comprehensive neuroscience care to diagnose, treat and heal patients with conditions like amyotrophic lateral sclerosis (ALS), multiple sclerosis, Parkinson's disease, epilepsy, spine pain, stroke and other neuroscience disorders. OhioHealth offers access to skilled specialists, the latest medical advancements, clinical trials, and exclusive wellness programs to develop individualized treatment plans.

The OhioHealth Neuroscience Care includes programs and services including but not limited to:

- **Access to Acute Care** – a 224-bed world class Neuroscience Center and certified stroke centers throughout Ohio.
- **Neurological Inpatient and Outpatient Rehabilitation** – serves patients needing rehabilitation services. Rehabilitation services are provided to patients in outpatient, hospital, and at home. Patients with neurological conditions are assisted to recover mobility, independence, and quality of life.

Examples of services that provides Outpatient Rehabilitation include but not limited to:

- + **Physical therapy** – OhioHealth uses advanced treatment techniques and equipment to improve strength, balance, walking, and muscle tightness due to spasticity or other neurologic causes. Examples of conditions include (a) treat dizziness with vestibular therapy, and (b) incontinence with pelvic floor therapy. We have therapists certified in different treatment approaches such as Parkinson Wellness Recovery! to serve for patients with Parkinson's disease (OhioHealth, 2015-2024). For example, the PWR! Moves® teach patients how to use high effort, large amplitude movements, and muscle activation. To focus on posture and alignment, the goal is to counteract rigidity, prevent falls and step bigger. To focus on weight shifting, the goal is to improve turns and rolls and widen base of support. To focus on trunk rotation, the goal is repetitive movements to lessen rigidity and improve movement Parkinson Wellness Recovery, 2023).
- + **Occupational Therapy** – OhioHealth's occupational therapists help patients relearn daily tasks and develop new strategies to achieve personal goals. OhioHealth's clinical experts address functional impairments in vision, cognition, mobility, and coordination helping patients return to independence in self-care, homemaking, community tasks, return-to-work, school, and driving (OhioHealth, 2015-2024). OhioHealth's therapists are certified in specialty areas such as Certified Brain Injury Specialists for patients with head injuries (Brain Injury Association of America, 2024).

- + **Speech Therapy** – OhioHealth provides speech therapy to overcome (a) difficulty with speaking (aphasia); (b) speech clarity (dysarthria); (c) memory and cognitive skills; (d) facial weakness; and (e) difficulty swallowing food and/or drinks. OhioHealth speech therapists use specialized techniques, including electrical stimulation, to treat swallowing disorders. In addition to caring for patients with neurologic conditions, OhioHealth's speech therapists are trained in treating impairments among individuals with head and neck cancer. OhioHealth's therapists are certified in treatment approaches such as SPEAK OUT!, for patients with Parkinson's disease (Parkinson Voice Project, Inc., 2024). The SPEAK OUT! Therapy program was developed by Parkinson Voice Project, to help patients with Parkinson's Disease and related disorders to retain their speech and swallowing. SPEAK OUT! provides education, individual therapy, group speech therapy, daily home practice, and follow-ups. Patients are encouraged to speak with intent (Parkinson Voice Project, 2024).

- **Ongoing Support and Education** – help patients and families beyond their hospital stay or annual appointments such as support groups and art therapy.
- **Access to Outpatient Clinics** – opportunity to have same-day access to dedicated neurologists, neurosurgeons, psychologists, advanced practice providers, nurse practitioners, medical assistants, nurses, social workers, rehabilitation therapists.
- **Wellness Programs** – programs that combine exercise, nutrition, education, and support to increase quality of life and a one-of-a-kind Neuroscience Wellness Center.
- **Neuroscience Services** – assessment, diagnosis, treatment and follow-up care for various neurological diseases such as but not limited to (a) Amyotrophic Lateral Sclerosis (ALS), (b) Behavioral and Mental Health; (c) Cerebrovascular events such as stroke, and aneurysm; (d) cognitive neurology; (e) epilepsy; (f) general neurology; (g) spine disorders such as sciatica, stenosis, degeneration; (h) movement disorders; (i) multiple sclerosis; (j) neurological rehabilitation; (k) Neuro-Oncology; (l) neuropsychology; and (m) neurosurgery.

**C – 2.6. OhioHealth Physician Group (OPG) Gastroenterology Services** – located at 1050 Delaware Avenue, Marion, Ohio 43302. OhioHealth physician specialists offer diagnosis and treatment for a wide range of esophageal, gastric, and duodenal disorders and conditions, including but not limited to the following:

- Barrett's esophagus
- Bile duct stones, obstruction
- Biliary Diseases
- Celiac disease
- Crohn's disease
- Colon cancer
- Constipation
- Esophageal disorders and cancer
- Gallstones
- Gastrointestinal bleeding
- Gastrointestinal diseases and disorders
- Gastroesophageal reflux disease (GERD)

- Inflammatory bowel diseases
- Irritable bowel syndrome
- Liver diseases
- Obscure gastrointestinal bleeding
- Pancreatitis
- Pancreatic cancer
- Peptic ulcers
- Small bowel tumors
- Ulcerative colitis

OhioHealth offers various procedures and services to screen, diagnose, and treat various gastrointestinal and hepatic disorders:

- **Advanced therapeutic endoscopy and ERCP** – ERCP stands for Endoscopic Retrograde Cholangiopancreatography, which examines the bile and pancreatic ducts using an endoscope. ERCP treats and evaluate stones, tumors, or narrowed areas of the bile and pancreatic ducts (National Library of Medicine, 2023).
- **Colonoscopy** – an exam that views the inside of the colon (large intestine) and rectum, using a tool called a colonoscope. The colonoscope is equipped with a small camera attached to a flexible tube that can reach the entire length of the colon. Colonoscopy is a type of colorectal cancer screening that is usually done once in 10 years (National Library of Medicine, 2023).
- **Deep small bowel enteroscopy** – examines the end of the small intestine using an enteroscope that may be attached to the colonoscope (National Library of Medicine, 2023).
- **Flexible sigmoidoscopy** – uses a sigmoidoscope, which is a flexible narrow tube with a tiny camera and light at one end to visualize inside the patient's rectum and lower colon (sigmoid colon and descending colon) and assess irritated or inflamed tissues, ulcerations, polyps, and cancerous growth (National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK), 2016).
- **Esophagoscopy** – once your provider sees signs of esophageal cancer from a preliminary test called "barium swallow", esophagoscopy will be used to visualize the esophagus and obtain biopsy samples when necessary.
- **Advanced Pancreatobiliary Endoscopy** – uses an endoscope to visualize the pancreas and bile duct as they empty into the duodenum and determine diseases (Vozzo and Sanaka, 2020).
- **PillCam™ small bowel video capsule endoscopy** – a camera at the size of a multivitamin is ingested by the patient with supervision of a clinician as a tool to visualize and monitor lesions in the small bowel. The lesions may help physicians assess conditions such as Crohn's disease, bleeding, and/or iron deficiency anemia (Medtronic, 2024).
- **Enteral tube placement, replacement and removal** – enables nutritional support for patients who have swallowing problems and other disorders.

- **Esophageal dilation swallowing** – enables physicians to determine causes of difficulty swallowing.
- **Esophagogastroduodenoscopy (EGD)** – utilizes upper endoscopy, whereby an endoscope is inserted through the mouth and down through the esophagus to the stomach (National Library of Medicine, 2023).
- **Biliary and pancreatic manometry** – evaluates movement and pressure of the pancreatic and bile ducts to assess functioning.
- **Percutaneous endoscopic gastrostomy (PEG) tube placement, replacement and removal** – placed through the skin and stomach wall to help patients who are unable to eat and drink due to stroke, brain injury, malfunctioning of the esophagus, or surgery of the head and neck, and other conditions.
- **BARRX esophagus ablation** – used to treat Barrett's esophagitis by removing abnormal and unwanted cells that formed due to exposure to stomach acid due to gastro-esophageal reflux disease (GERD) (National Library of Medicine, 2024).

**C – 2.7. OhioHealth Physician Group (OPG) Primary Care** – serves patients primary care and family medicine needs in seven locations in Marion, Ohio.

- **OPG Primary Care Marion Barks Road** – located at 278 Barks Road West, Marion, Ohio 43302. The primary care services at OPG Primary Care Marion Barks Road include but not limited to:
  - + Wellness and preventive care.
  - + Immunizations and annual health screenings.
  - + Care for children and adolescents.
  - + Well-baby and well-child check-ups.
  - + Annual health screenings and physical exams.
  - + School and sports physicals.
  - + Illness care.
  - + Coordination of diagnostic tests, specialty referral and hospital services.
  - + Chronic disease management.

- **OPG Primary Care Marion 1050 Delaware Avenue** – located at 1050 Delaware Avenue, Marion, Ohio 43302. The primary care services at OPG Primary Care Marion 1050 Delaware Ave include but not limited to:
  - + General internal medicine.
  - + Comprehensive physical examinations.
  - + Well care and prevention.
  - + Health screenings.
  - + Illness care.
  - + Well-woman exams.
  - + Immunizations.
  - + Pre-admission testing.
  - + Age-specific screenings.
  - + Expert treatment for illness.
  - + Comprehensive chronic disease management and care coordination for allergy, asthma, diabetes, hypertension, high cholesterol and thyroid disease.
- **OPG Primary Care Marion 1040 Delaware Avenue** – located at 1040 Delaware Avenue, Marion, Ohio 43302. The primary care services at OPG Primary Care Marion 1040 Delaware Avenue include but not limited to:
  - + General internal medicine..
  - + Comprehensive physical examinations
  - + Well care and prevention.
  - + Health screenings.
  - + Illness care.
  - + Well-woman exams.
  - + Immunizations.
  - + Pre-admission testing.
  - + Age-specific screenings.
  - + Expert treatment for illness.
  - + Comprehensive chronic disease management and care coordination for allergy, asthma, diabetes, hypertension, high cholesterol and thyroid disease.

**C – 2.8. Marion Public Health** – offers public health clinics for immunizations. sexual health, tuberculosis, and access to Women, Infants and Children programs and services (Marion Public Health, 2024).

## D. How Data Was Obtained

OhioHealth Marion General Hospital collected the data from various sources as follows:

- D – 1.** The definition of the community served by OhioHealth Marion General Hospital was developed by determining the percentage of patients who resided in Richland County during Fiscal Year 2022 and 2023, based on electronic medical records. See **Section A**.
- D – 2.** The demographic data of the Marion County population was obtained from the Ohio Department of Development (n.d.). See **Section B**.
- D – 3.** Pertinent health data from Ohio's 2019 State Health Assessment and the 2022 Online State Health Assessment (Ohio Department of Health, 2022.). See **Appendix A**.
- D – 4.** Pertinent health and health-related data for Marion County, Ohio versus State of Ohio, and United States (County Health Rankings, 2024; Ohio Department of Health, 2022); Ohio Department of Health (2023). See **Appendix B**.

No information gaps were identified that may impact the ability to assess health needs during this community health needs assessment process.

## E. The Significant Health Needs of the Community

Prioritization of significant health needs in Marion County and the OhioHealth alignment with the SHIP was accomplished during the OhioHealth Marion General Hospital's virtual public meeting on 6/26/2024, 9:30 AM to 12:00 PM through Microsoft Teams. **Table 3** summarizes the prioritized significant health needs related to mental health and addiction, chronic disease, maternal, infant and child health, access to care, and social determinants of health.

**Tables 4 to 8** lists the significant health needs in Marion County that were identified by the community stakeholders and their corresponding prioritization votes. The votes of community stakeholders related to OhioHealth Marion General Hospital's alignment with the 2020-2022 State Health Improvement Plan (SHIP) are also indicated.

**Table 3. Summary of Marion County’s priority health needs and alignment with Ohio’s 2020-2022 State Health Improvement Plan (SHIP) that were determined by community stakeholders during the OhioHealth Marion General Hospital virtual public meeting on June 26, 2024.**

Marion County Priority Health Needs	Details of Priority Health Needs	Alignment with Ohio’s SHIP
Mental Health and Addiction (MHA)	<p><b>MHA – 1</b> Various types of addiction, including alcohol and other drugs).</p> <p><b>MHA – 2</b> Mental health, including addressing the need for training of providers serving vulnerable populations.</p> <p><b>MHA – 3</b> Negative impacts of Adverse Childhood Experiences (ACES) on mental health, substance use disorder, and chronic health conditions.</p>	<p>Yes.</p> <p>Mental Health and Addiction is a priority health outcome in Ohio SHIP.</p>

Infectious Diseases (ID)	<b>ID – 2</b>  Other Communicable Diseases	Yes = 9 votes  No = 0 vote		Community stakeholders voted that OhioHealth Marion General's Fiscal Years 2026-2028 Implementation Strategy will not align with SHIP related to Infectious Diseases.

## F. Primary and Chronic Disease Needs, and Other Health Issues of Uninsured Persons, Low-income Persons, and Minority Groups

**Appendices A and B** show the health and health-related data affecting the uninsured persons, low-income persons, and minority groups in Marion County in Ohio. Whenever available, comparable data for Ohio and United States are included in the summary.

## G. The Process for Identifying and Prioritizing Community Health Needs and Services to Meet Community Health Needs

OhioHealth Marion General Hospital in collaboration with OhioHealth External Affairs conducted a virtual public meeting on June 26, 2024, 9:30 AM to 12:00 PM through Microsoft Teams. OhioHealth sought the community stakeholder inputs of significant health needs in Marion County from June 5 to June 26, 2024.

The stakeholders prioritized the significant health needs in Marion County based on the following criteria: (a) magnitude of the problem; (b) the availability of resources to address the need; and (c) ability for OhioHealth Marion General Hospital and the Marion County community to demonstrate outcomes and impact from interventions that will be developed to collaboratively address the priority health needs.

## H. The Process for Consulting with Persons Representing the Community's Interests and Input Provided

**Table 9** summarizes OhioHealth Marion General Hospital's processes for consulting with community stakeholders in Marion County. **Appendix C** lists the organizations that participated in the public meeting, including details on (a) knowledge and skills in public health; (b) description of the medically underserved, low-income or minority populations represented by the organization; (c) inputs of community stakeholders; (d) time frame of inputs; (e) website of organization; (f) mission of organization; and (g) examples of programs and services.

**Table 9. Summary of activities related to OhioHealth Marion General Hospital's seeking of public input on the priority health needs in Marion County.**

Dates	Activities
June 5, 2024	<ul style="list-style-type: none"> <li>Jeffrey R. Kasler, Director of OhioHealth Government Relations sent an email invite to various Marion County stakeholders to attend a virtual public meeting to be held on June 26, 2024, 9:30 AM to 12:00 PM through Microsoft Teams. The purpose of the meeting was to prioritize the significant health needs in Marion County and determine OhioHealth Marion General Hospital's alignment with Ohio's 2020-2022 State Health Improvement Plan (SHIP).</li> <li>The email invite included two data files: (a) Marion County Profile from the Ohio Department of Development and (b) Health and Health-Related Data report for Ohio and Marion County that was created by Mary Ann G. Abiado, PhD, MSN, RN, Data Management and Evaluation Specialist and Community Health Nurse at OhioHealth based upon publicly available data.</li> <li>The community stakeholders were requested to identify the significant health needs affecting Marion County based on: (a) two data files and (b) experiences in serving patients or people from Marion County.</li> </ul>
June 5, 2024 to June 26, 2024	<ul style="list-style-type: none"> <li>Community stakeholders sent their inputs on their assessment of significant health needs in Marion County to Mary Ann G. Abiado from OhioHealth.</li> </ul>
June 26, 2024; 9:30 AM to Noon	<ul style="list-style-type: none"> <li>OhioHealth Marion General Hospital in collaboration with OhioHealth External Affairs held the public meeting.</li> <li>Jeffrey Kasler, Director of Government Relations, and Mary Ann G. Abiado facilitated the public meeting.</li> <li>The stakeholders verbally stated additional significant health needs affecting Marion County.</li> <li>The stakeholders voted on the priority health needs in Marion County, and the OhioHealth alignment with the State Health Improvement Plan (SHIP).</li> <li>OhioHealth documented the community stakeholder votes and the discussions.</li> </ul>

# I. The Impact of Any Actions Taken to Address the Significant Health Needs Identified in the Hospital Facility's 2022 CHNA

**Appendix D** summarizes the impact of OhioHealth Marion General Hospital Community Benefit programs that addressed the priority health needs in the OhioHealth board-approved 2025 Community Health Needs Assessment and Fiscal Years 2023-2025 Implementation Strategy.

## J. Contracted Organizations to Assist with Conducting the CHNA

There were no contractors involved in the conduct of the OhioHealth Marion General Hospital Community Health Needs Assessment (CHNA).

Mary Ann G. Abiado, PhD, MSN, RN, OhioHealth's Data Management and Evaluation Specialist and Community Health Nurse has over 14 years of experience in writing OhioHealth's Community Health Needs Assessment (CHNA) and developing Implementation Strategies to address the priority health needs. The 2025 OhioHealth Marion General Hospital's CHNA and Fiscal Years 2026-2028 Implementation Strategy were reviewed by the following OhioHealth leaders:

- Jim Parobek – President, OhioHealth Marion General Hospital.
- Jamie Cunningham, MBA, BSN, BS – Chief Nursing Officer and Vice President, Patient Care Services.
- Charity Coffman, MSN, BSN, RN – Director of Nursing, Inpatient Services and Women's Health.
- Jeffrey R. Kasler – Director, Government Relations, OhioHealth.

The OhioHealth Legal Department has reviewed the content of the OhioHealth Marion General Hospital CHNA and assessed that the contents are compliant with the Internal Revenue Service's requirements for nonprofit hospitals.

# Appendix A. Summary of Data and Information from Ohio's 2019 State Health Assessment and 2022 Online State Health Assessment Portal (Ohio Department of Health, n.d.)

**Appendix Table 1. Summary of findings from the 2022 Online State Health Assessment.**

Findings	Description and Data Details
Ohioans' overall wellbeing declined.	<ul style="list-style-type: none"> <li>Premature death, life expectancy and overall health worsened.</li> <li>The leading causes of premature death in 2017 were unintentional injuries (including drug overdose), cancer, and heart disease.</li> <li>Ohio's life expectancy dropped from 77.6 years in 2010 to 76.5 years in 2017.</li> <li>Increase in infant deaths, blood pressure, late-stage cancer diagnosis was observed.</li> <li>Black or African Americans life expectancy in 2017 was 72.8 years compared to 77 among Whites.</li> </ul>
Ohioans' lack opportunities to reach full health potential.	<ul style="list-style-type: none"> <li>Ohioans who are black or African American, with low income, with disabilities or live in Appalachian counties have worse health outcomes compared to overall Ohio population.</li> </ul>
Health promotion activities need to be addressed.	<ul style="list-style-type: none"> <li>Interventions need to focus on the following: (i) physical activity, (ii) tobacco use, (iii) access to dental care, (iv) access to mental health, (v) income disparities, (vi) unemployment, (vii) adverse childhood experiences (ACEs), (viii) access to transportation, (ix) lead poisoning and (x) racism.</li> </ul>
Ohio's significant health challenges continue to be mental health and addiction, chronic disease, and maternal and infant health.	<ul style="list-style-type: none"> <li>Ohio's performance worsened or did not improve.</li> <li>Cross-cutting factors include poverty, lack of access to transportation, lack of physical activity, unhealthy eating, and lack of access to care.</li> </ul>
Multi-sector collaboration is important to improve health.	<ul style="list-style-type: none"> <li>Approximately 80 percent of modifiable factors that can improve health are related to health behaviors (healthy eating and tobacco cessation) and social determinants of health (housing, transportation, education, employment).</li> <li>Poverty, racism, discrimination, trauma, violence, and toxic stress lead to health disparities.</li> </ul>

## Findings from Appendix Table 1.

Ohioans have been afflicted with alarming rates of mental health and addiction, chronic diseases, and poor birth outcomes. Outcomes-focused collaborations among government, health care systems and community organizations are necessary to improve health and increase access to health care services.

**Appendix Table 2. Data on overall health status and premature death in Ohio and population groups with the worst outcome.**

Desired Outcome	Indicator	Ohio (2015)	Ohio (2017)	Ohio (2020)	United States (2020)
Improve overall health status	% of adults with fair or poor health	16.5%	18.9%	15%	12%
	<b>Worst outcome</b>  Low-income adults (less than \$15,000 annual household income)	38.6%	45.1%	No data	No data
Reduce premature death	Years of potential life lost before age 75, per 100,000 population (age-adjusted)	7,876.1 years lost before age 75 per 100,000	8,774.5 years lost before age 75 per 100,000	8,700 years lost before age 75 per 100,000 (2018-2020)	7,300 years lost before age 75 per 100,000 (2018-2020)
	<b>Worst outcome</b>  Black (non-Hispanic)	10,850.5 years lost before age 75 per 100,000	12,599 years lost before age 75 per 100,000	No data	No data

**Summary of Findings from Appendix Table 2.**

In 2020, 15% of adults in Ohio considered themselves in fair or poor health compared to 12% of adults in the United States. There was a 3.9% reduction in the percent of Ohio adults with fair or poor health in 2020 compared to 2017. From 2018-2020, in Ohio, 8,700 years of life were lost due to deaths of Ohioans under age 75 per 100,000 people compared to 7,300 years of life lost due to deaths in the United States.

**Appendix Table 3. Ohio outcomes data on reducing depression, reducing drug dependence or abuse, and reducing suicide deaths compared to the United States. Data shows Ohio's progress in addressing mental health and addiction.**

Desired Outcome	Indicator	Ohio (2013-2014)	Ohio (2015-2016)	Ohio (2020)	United States (2020)
Reduce depression (%).	% of persons 12-17 years with a major depressive episode in the past year.	10.33%	13.98%	18.25%	17%
	% persons ages 18+ with a major depressive episode in the past year.	7.33%	7.85%	9.25%	6%
Desired Outcome	Indicator	Ohio (2013-2014)	Ohio (2015-2016)	Ohio (2018-2019)	United States (2018-2019)
Reduce drug dependence or abuse (%).	% persons age 12+ who has illicit drug dependence or abuse in the past year.	2.76%	2.61%	4%	4%
Desired Outcome	Indicator	Ohio (2015)	Ohio (2015-2016)	Ohio 2016-2020)	United States (2016-2020)
Reduce suicide deaths (Number of deaths per 100,000 population).	Number of suicide deaths per 100,000 population.	13.9	14.8	15	14
	Males ages 10-24.	15.9	18.5	No data	No data
	Males ages 25-44.	28.5	33.6	No data	No data
	White (non-Hispanic) males ages 45-64.	34	32.1	No data	No data
	White (non-Hispanic) males ages 65+.	32.2	33	No data	No data

**Continuation of Appendix Table 3. Ohio outcomes data on reducing depression, reducing drug dependence or abuse, and reducing suicide deaths compared to the United States. Data shows Ohio's progress in addressing mental health and addiction.**

Desired Outcome	Indicator	Ohio (2015)	Ohio (2015-2016)	Ohio (2018-2020)	Ohio (2018-2020)
Reduce unintentional drug overdose death (Number of deaths per 100,000 population).	Number of deaths due to unintentional drug overdoses per 100,000 population.	27.7	44.1	38	23
	White (non-Hispanic) males ages 25-44.	87.1	136.7	No data	No data
	White (non-Hispanic) males ages 45-64.	43.5	72.4	No data	No data
	White (non-Hispanic) females ages 25-54.	39.7	59.9	No data	No data
	Black (non-Hispanic) males ages 25-54.	50.9	99	No data	No data
	Black (non-Hispanic) males 55-64.	74.7	137.8	No data	No data

**Summary of Findings from Appendix Table 3.**

Depression, drug dependence or abuse, suicide and unintentional drug overdose deaths showed an increasing trend in Ohio.

**Appendix Table 4. Ohio's outcomes related to reducing heart disease, hypertension, diabetes, prediabetes, and child asthma morbidity. Data shows Ohio's progress in addressing chronic diseases.**

Desired Outcome	Indicator	Baseline (2015)	Ohio (2017)	Ohio (2021)	United States (2021)
Reduce heart disease (%).	% of adults ever diagnosed with coronary heart disease.	4.2%	4.7%	4.6%	4.9%
	% of adults ever diagnosed with heart attack.	4.9%	5.5%	5.2%	No data
Reduce hypertension (%).	% of adults ever diagnosed with hypertension.	34.3%	34.7%	35.6%	49.6%
	Black or African American (non-Hispanic).	40.3%	40%	No data	No data
	People with a disability.	53.1%	No data	No data	No data
	People with less than high school diploma.	40.7%	48.9%	No data	No data
	People with less than \$15,000 annual household income.	35.7%	46.6%	No data	No data
	People older than 65 years.	62.2%	60%	No data	No data
	People who live in Appalachian counties.	39.7%	No data	No data	No data

**Continuation of Appendix Table 4. Ohio's outcomes related to reducing heart disease, hypertension, diabetes, prediabetes, and child asthma morbidity. Data shows Ohio's progress in addressing chronic diseases.**

Desired Outcome	Indicator	Baseline (2015)	Ohio (2017)	Ohio (2019)	United States (2017-2020)
Reduce diabetes (%).	% of adults who have been told by a health professional that they have diabetes.	11%	11.3%	12.6%	16.3%
	Black or African American (non-Hispanic).	14.1%	14.2%	No data	No data
	People with a disability.	21.8%	No data	No data	No data
	People with less than high school diploma.	13.6%	15.8%	No data	No data
	People with less than \$15,000 annual household income.	13.7%	19.4%	No data	No data
	People older than 65 years.	23.4%	22.8%	No data	No data
	People who live in Appalachian counties.	12.3%	No data	No data	No data
Desired Outcome	Indicator	Baseline (2015)	Ohio (2017)	Ohio (2019)	United States (2017-2020)
Monitor prediabetes (%).	% of adults who have been told by a health professional that they have prediabetes.	7.5%	8.8%	9.5%	10.8%
Desired Outcome	Indicator	Baseline (2015)	Ohio (2017)	Ohio (2017-2018)	United States (2010-2018)
Reduce child asthma morbidity (Emergency department visits per 10,000 children).	Emergency department visits for pediatric asthma, per 10,000 children, ages 0-17 (does not include patients with cystic fibrosis or respiratory system abnormalities or transfers).	86.9	72.3	80.3	88.1
	Black or African American.	245.6	175.9	No data	No data
	Appalachian counties.	78.2	No data	No data	No data

**Summary of Findings from Appendix Table 4.**

The prevalence of heart disease, hypertension, diabetes, and prediabetes in Ohio show an increasing trend. The emergency department visits for pediatric asthma shows a declining trend.

**Appendix Table 5. Ohio's outcomes related to reducing preterm birth, low birth weight, and infant mortality. Data shows Ohio's progress in addressing maternal and infant health.**

Desired Outcome	Indicator	Ohio (2015)	Ohio (2017)	Ohio (2021)	United States (2020)
Reduce preterm births (%).	% of live births that are preterm, less than 37 weeks gestation.	10.3%	10.4%	10.59%	10.49%
	Black, non-Hispanic.	14.1%	14.3%	No data	No data
	People with less than high school diploma.	11.5%	11.7%	No data	No data
	Less than 18 years old.	10.7%	10.7%	No data	No data
Reduce very preterm births (%).	% of births which the newborn weighed less than 32 weeks.	1.7%	1.8%	1.6%	1.5%
Desired Outcome	Indicator	Ohio (2015)	Ohio (2017)	Ohio (2014-2020)	United States (2020)
Reduce low birth-weight births (%).	% of births in which the newborn weighed less than 2,500 grams.	8.5%	8.7%	9%	8%
	Black, non-Hispanic.	13.9%	14.3%	No data	No data
	People with less than high school diploma.	10.8%	11.3%	No data	No data
	Less than 18 years old.	10.2%	10.8%	No data	No data
Desired Outcome	Indicator	Ohio (2015)	Ohio (2017)	Ohio (2014-2020)	United States (2020)
Reduce infant mortality.	Rate of infant deaths per 1,000 live births.	7.2	7.2	7.0	6.0
	Black, Non-Hispanic.	15.2	15.8	No data	No data
Desired Outcome	Indicator	Ohio (2015)	Ohio (2017)	Ohio (2019)	United States (2019)
Reduce neonatal infant deaths.	Rate of neonatal infant deaths (birth through 27 days of life) per 1,000 live births.	4.8	5	4.6	3.7

**Summary of Findings from Appendix Table 5.**

Ohio's infant mortality rate, neonatal infant death rate, and percent of very preterm births showed a declining trend. However, the percent of preterm births and low birth weights in Ohio showed an increasing trend.

**Appendix Table 6. Ohio's outcomes related to social determinants of health, such as housing, job and income availability compared to United States. Data shows Ohio's progress in addressing social determinants of health.**

Measure	Year	Ohio	United States
<b>Access to housing assistance</b>  Average number of months spent on HUD housing assistance waiting list.	2017	22 months	27 months
<b>Food insecurity</b>  Percent of households that are food insecure.	2017	14.5%	12.5%
<b>Incarceration rate</b>  Imprisonment rate of sentenced prisoners under the jurisdiction of state or federal correctional authorities per 100,000 residents.	2019	430	419
<b>Severe housing burden for renters (Less than \$20,000 household income)</b>  Households spending 30% or more of income on housing as a percent of renter-occupied housing units where the household income is less than \$20,000.	2019	86.3%	88.7%
<b>Severe housing burden for renters (\$20,000 to \$34,999)</b>  Households spending 30% or more of income on housing as a percent of renter-occupied housing units where the household income is \$20,000 to \$34,999.	2019	65.8%	78.6%

**Continuation of Appendix Table 6. Ohio's outcomes related to social determinants of health, such as housing, job and income availability compared to United States. Data shows Ohio's progress in addressing social determinants of health.**

Measure	Year	Ohio	United States
<b>Severe housing burden for renters (\$35,000 to \$49,999)</b>  Households spending 30% or more of income on housing as a percent of renter-occupied housing units where the household income is \$35,000 to \$49,999.	2019	25.6%	50.2%
<b>Severe housing burden for renters (\$50,000 to \$74,999 household income)</b>  Households spending 30% or more of income on housing as a percent of renter-occupied housing units where the household income is \$35,000 to \$49,999.	2019	6.7%	26.2%
<b>Labor force participation</b>  Labor force participation rate, ages 16 and over.	2019	63.5%	63.6%
<b>Out-of-pocket spending on health care</b>  Percent of people whose out-of-pocket spending on health care accounted for more than 10% of annual income.	2020	21.1%  <b>Breakdown per race:</b> <ul style="list-style-type: none"> <li>African American – 12.2%</li> <li>White – 23.6%</li> </ul>	17.4%  <b>Breakdown per race:</b> <ul style="list-style-type: none"> <li>African American – 16.5%</li> <li>White – 18.5%</li> </ul>
<b>Low income working families with children</b>  Low income working families with children as a percent of all families.	2019	22%	22%

**Summary of Findings from Appendix Table 6.**

Compared to the United States, Ohio has higher rates of food insecurity, incarceration rate and percent of people where their out-of-pocket spending for healthcare comprised more than 10% of their income.

**Appendix Table 7. Outcomes related to adolescent suicide, adolescent well visits, adolescent bullying, adult obesity, adult poverty, adult smoking or adverse childhood experiences, child abuse and neglect, intimate partner violence, and depression in Ohio compared to the United States. Data were obtained from the 2022 Online State Health Assessment (Ohio Department of Health, n.d.).**

Measure	Year	Ohio	United States
<b>Adolescent suicide</b>  Adolescent suicide rate, ages 15-19, per 100,000.	2020	11.3 per 100,000	10.8 per 100,000
<b>Adolescent well visit</b>  Percent of adolescents, ages 12 through 17, with a preventive medical visit in the past year (2-year estimate).	2020	82.5%	80.7%
<b>Adult obesity</b>  Percent of adults 18+ who are obese (>95 <sup>th</sup> percentile for body mass index).	2020	35.5%	31.9%
<b>Adult poverty</b>  Percent of persons age 18+ who live in households at or below the poverty threshold (<100 Federal Poverty Level).	2019	12.3%	11.9%
<b>Adult smoking</b>  Percent of adults who are current smokers.	2020	19.3%	15.5%
<b>Adverse childhood experiences</b>  Percent of children who have experienced two or more adverse experiences among households with 100 to 199% federal poverty level.	2020	29.9%	24.9%

**Continuation of Appendix Table 7. Outcomes related to adolescent suicide, adolescent well visits, adolescent bullying, adult obesity, adult poverty, adult smoking or adverse childhood experiences, child abuse and neglect, intimate partner violence, and depression in Ohio compared to the United States. Data were obtained from the 2022 Online State Health Assessment (Ohio Department of Health, n.d.).**

Measure	Year	Ohio	United States
<b>Adverse childhood experiences</b>  Percent of children who have experienced two or more adverse experiences among households with 200 to 399% federal poverty level.	2020	18.7%	16.7%
<b>Adverse childhood experiences</b>  Percent of children who have experienced two or more adverse experiences among households with 400% federal poverty level or greater.	2020	8%	8.1%
<b>Adverse childhood experiences</b>  Percent of children who have experienced two or more adverse experiences.	2020	20.4%	18.1%
<b>Adolescent Bullying (perpetrators)</b>  Percent of adolescents, ages 12 through 17, who bully others (perpetrators).	2020	14.7%	13.7%
<b>Adolescent Bullying (Victims)</b>  Percent of adolescents, ages 12 through 17, who are bullied.	2020	40.5%	35.2%
<b>Child Abuse and Neglect</b>  Rate of child maltreatment victims per 1,000 children in population.	2020	9.2 per 1,000 children	8.4 per 1,000 children
<b>Homicide deaths</b>  Number of deaths due to homicide per 100,000 population (age adjusted).	2020	9.2	7.2
<b>Intimate partner violence</b>  Lifetime prevalence of rape, physical violence, and/or stalking by an intimate partner for women.	2012	38%	37.3%

**Continuation of Appendix Table 7. Outcomes related to adolescent suicide, adolescent well visits, adolescent bullying, adult obesity, adult poverty, adult smoking or adverse childhood experiences, child abuse and neglect, intimate partner violence, and depression in Ohio compared to the United States. Data were obtained from the 2022 Online State Health Assessment (Ohio Department of Health, n.d.).**

Measure	Year	Ohio	United States
<b>Major Depressive Episodes</b>  Percent of persons age 18+ who experienced a major depressive episode within the past year.	2019	8.8%	7.5%
<b>Youth depression prevalence</b>  Percent of adolescents aged 12-17 who have had at least one major depressive episode.	2019	14.7%	15.1%
<b>Youth with depression who did not receive mental health services</b>  Percent of youth with major depressive episode who did not receive any mental health treatment.	2018	52.2%	59.6%
<b>Unmet need for mental health</b>  Percent of adults age 18 and older with past year mental illness who reported that their perceived need for treatment/counseling was not received.	2018	22.1%	23.6%

**Summary of Findings from Appendix Table 7.**

Compared to the United States, Ohio's population have higher rates of adolescent suicide, obesity, poverty, smoking, adverse childhood experiences, adolescent bullying, child abuse and neglect, intimate partner violence, homicide deaths, major depressive episode. and insufficient sleep.

**Appendix Table 8. Outcomes related to excessive drinking, illicit drug use and dependence, illicit drug use, marijuana use, alcohol, cigarettes, cocaine, heroin, and unintentional injuries in Ohio compared to the United States. Data were obtained from the 2022 Online State Health Assessment (Ohio Department of Health, n.d.).**

Measure	Year	Ohio	United States
<b>Excessive drinking</b>  Percent of adults reporting binge drinking, defined as consuming more than 4 (women) or 5 (men) alcoholic beverages on a single occasion in the past 30 days.	2020	16.3%	15.7%
<b>Illicit drug abuse and dependence</b>  Percent of persons age 12+ with past-year illicit drug use disorder.	2020	5.9%	6.6%
<b>Illicit drug use</b>  Percent of individuals aged 12+ with illicit drug use in the past month.	2020	12.7%	13.2%
<b>Marijuana use</b>  Percent of individuals aged 12+ with marijuana use in past month (2014-2016); substate estimates are calculated on groups of counties.	2016	8.1%	8.5%
<b>Perceived risk of alcohol</b>  Percent of individuals aged 12-17 perceiving great risk of having 5 or more drinks of an alcoholic beverage once or twice a week.	2020	43%	35.5%
<b>Perceived risk of cigarettes</b>  Percent of individuals aged 12-17 perceiving great risk of smoking one or more packs of cigarettes per day.	2020	63%	66.1%
<b>Perceived risk of cocaine</b>  Percent of individuals aged 12-17 perceiving great risk of intaking cocaine once a month.	2020	50.3%	53.3%
<b>Perceived risk of heroin</b>  Percent of individuals aged 12-17 perceiving great risk of trying heroin once or twice.	2020	62.3%	62%

**Continuation of Appendix Table 8. Outcomes related to excessive drinking, illicit drug use and dependence, illicit drug use, marijuana use, alcohol, cigarettes, cocaine, heroin, and unintentional injuries in Ohio compared to the United States. Data were obtained from the 2022 Online State Health Assessment (Ohio Department of Health, n.d.).**

Measure	Year	Ohio	United States
<b>Perceived risk of marijuana</b>  Percent of individuals aged 12-17 perceiving great risk of smoking marijuana once a month.	2020	22.2%	22.8%
<b>Unintentional injuries (including drug overdose and motor vehicle accidents)</b>  Annual age-adjusted mortality rates for the leading causes of death, per 100,000 population, Ohio.	2020	78.2 per 100,000	57.6 per 100,000
<b>Unmet need for illicit drug use treatment</b>  Percent ages 12 and older needing but not receiving treatment for illicit drug use in the past year, 2019-2020.	2020	5.3%	6.3%

**Summary of Findings from Appendix Table 8.**

Compared to the United States, Ohio's population has higher rates of unintentional injuries (combined drug overdose and motor vehicle accidents).

**Appendix Table 9. Outcomes related to access to exercise, asthma prevalence, depression, diabetes, obesity, smoking, Alzheimer's Disease, and cancer in Ohio compared to the United States. Data were obtained from the 2022 Online State Health Assessment (Ohio Department of Health, n.d.).**

Measure	Source	Year	Ohio	United States
<b>Access to exercise opportunities</b>  Percent of individuals who live reasonably close to a location for physical activity (County Health Rankings, 2023).	County Health Rankings (2023); Ohio Department of Health Online State Health Assessment (n.d.)	2020, 2022	84%	84%
<b>Prevalence of asthma in children</b>  Estimated prevalence of children aged 0-17 who currently have asthma.	Ohio Department of Health Online State Health Assessment (n.d.)	2019	7.7%	7.4%
<b>Adult asthma prevalence (crude rate)</b>  Estimated crude prevalence of adults who currently have asthma.	Ohio Department of Health Online State Health Assessment (n.d.)	2019	11.1%	9%
<b>Adult depression prevalence (crude rate)</b>  Estimated crude prevalence of adults ever diagnosed with depression.	Ohio Department of Health Online State Health Assessment (n.d.)	2020	22%	19.6%
<b>Adult diabetes prevalence (crude rate)</b>  Crude percent of adults who have been told by a health professional that they have diabetes.	Ohio Department of Health Online State Health Assessment (n.d.)	2020	12.4%	10.6%
<b>Prevalence of obesity among adolescents, ages 10-17 (total)</b>  Percent of adolescents, ages 10 through 17, who are obese (BMI at or above the 95th percentile).	Ohio Department of Health Online State Health Assessment (n.d.)	2019	15.7%	16%

**Continuation of Appendix Table 9. Outcomes related to access to exercise, asthma prevalence, depression, diabetes, obesity, smoking, Alzheimer's Disease, and cancer in Ohio versus United States. Data were obtained from the 2022 Online State Health Assessment (Ohio Department of Health, n.d.).**

Measure	Source	Year	Ohio	United States
<b>Prevalence of obesity among high school students (African American)</b>  Percent of adolescents, ages 10 through 17, who are obese (BMI at or above the 95th percentile).	Ohio Department of Health Online State Health Assessment (n.d.)	2019	21.5%	21.1%
<b>Prevalence of obesity among high school students (White)</b>  High school students who were greater than or equal to 95th percentile for body mass index, based on sex- and age-specific reference data from the 2000 CDC growth charts.	Ohio Department of Health Online State Health Assessment (n.d.)	2019	15.2%	13.1%
<b>Prevalence of obesity among high school students (total)</b>  High school students who were greater than or equal to 95th percentile for body mass index, based on sex- and age-specific reference data from the 2000 CDC growth charts.	Ohio Department of Health Online State Health Assessment (n.d.)	2019	16.8%	15.5%
<b>Adult smoking</b>  Percent of adults who are current smokers.	Ohio Department of Health Online State Health Assessment (n.d.)	2020	19.3%	15.5%

**Continuation of Appendix Table 9. Outcomes related to access to exercise, asthma prevalence, depression, diabetes, obesity, smoking, Alzheimer's Disease, and cancer in Ohio compared to the United States. Data were obtained from the 2022 Online State Health Assessment (Ohio Department of Health, n.d.).**

Measure	Source	Year	Ohio	United States
<b>Alzheimer's Disease Mortality Rate</b>  Annual age-adjusted mortality rates for the leading causes of death, per 100,000 population.	Ohio Department of Health Online State Health Assessment (n.d.); Centers for Disease Control and Prevention National Center for Health Statistics (2023)	2020, 2021	38 per 100,000	36 per 100,000
<b>Cancer Mortality Rate</b>  Annual age-adjusted mortality rates for the leading causes of death, per 100,000 population.	Ohio Department of Health Online State Health Assessment (n.d.); Centers for Disease Control and Prevention (2022)	2020	159.1 per 100,000	144.1 per 100,000

**Summary of Findings from Appendix Table 9.**

Compared to the United States, Ohio's population have higher rates of the following: (a) adult asthma prevalence, (b) adult depression prevalence, (c) adult diabetes prevalence, (d) adult obesity, (e) prevalence of obesity among high school students, (f) adult smoking, (g) Alzheimer's Disease, and (h) cancer mortality rates.

**Appendix Table 10. Outcomes related to breastfeeding, obesity among children, and child asthma, child masculinization, child poverty, infant mortality rate, low birth weight, preterm birth, safe sleep for Ohio compared to the United States. Data were obtained from the 2022 Online State Health Assessment (Ohio Department of Health, n.d.).**

Measure	Year	Ohio	United States
<b>Breastfeeding – Ever</b>  Percent of infants who are ever breastfed.	2018	82.3%	83.9%
<b>Breastfeeding at Six Months</b>  Percent of infants who are breastfed at 6 months of age.	2018	50%	56.7%
<b>Teen birth rate</b>  Number of births per 1,000 female population ages 15-19.	2020	17.6 per 1,000 females	15.4 per 1,000 females
<b>Safe sleep</b>  Percent of infants most often laid on his or her back to sleep.	2014	89.1%	88.9%
<b>Infant mortality rate among total population</b>  Number of infant deaths per 1,000 live births (total).	2018	6.9 per 1,000 live births	5.7 per 1,000 live births
<b>Infant mortality rate among African Americans</b>  Number of infant deaths per 1,000 live births among Non-Hispanic African Americans.	2018	14 per 1,000 live births	10.8 per 1,000 live births

**Continuation of Appendix Table 10. Outcomes related to breastfeeding, obesity among children, and child asthma, child masculinization, child poverty, infant mortality rate, low birth weight, preterm birth, safe sleep in Ohio compared to the United States. Data were obtained from the 2022 Online State Health Assessment (Ohio Department of Health, n.d.).**

Measure	Year	Ohio	United States
<b>Low birth weight</b>  Percent of birth in which the newborn weighed <2,500 grams.	2020	8.5%	8.3%
<b>Preterm birth</b>  Percent of live births that are preterm (< 37 weeks gestation.	2020	10.3%	10.2%
<b>Prenatal care during first trimester</b>  Percent of women who completed a pregnancy in the last 12 months who received prenatal care in the first trimester.	2020	73.3%	77.7%

**Summary of Findings from Appendix Table 10.**

Compared to the United States, infant mortality rate and teen birth rate in Ohio in 2020 were higher. Infant mortality rates among African Americans are 2.6 times compared to infant mortality rates among Whites.

## Appendix B. Summary of Health and Health-Related Data for Marion County

**Appendix Table 11. Summary of Health Outcomes Data for Marion County compared to Ohio and United States (County Health Rankings, 2024).**

Data	Data Years	Marion County	Ohio	United States
<b>Premature Death</b>  Years of potential life lost before age 75 per 100,000 population (age adjusted).	2019-2021	11,000 years of potential life lost per 100,000 people	9,400 years of potential life lost per 100,000 people	8,000 years of potential life lost per 100,000 people
<b>Disaggregated by Race</b>				
Non-Hispanic Black	2019-2021	9,800 years of potential life lost per 100,000 people	No data	No data
Non-Hispanic White	2019-2021	11,500 years of potential life lost per 100,000 people	No data	No data
<b>Leading Causes of Death under Age 75 (crude rate)</b>				
Malignant neoplasms	2019-2021	147.8 per 100,000 people	No data	No data
Diseases of heart	2019-2021	129.5 per 100,000 people	No data	No data
Accidents	2019-2021	84.7 per 100,000 people	No data	No data
COVID-19	2019-2021	57.6 per 100,000 people	No data	No data
Chronic lower respiratory diseases	2019-2021	55.9 per 100,000 people	No data	No data

**Continuation of Appendix Table 11. Summary of Health Outcomes Data for Marion County compared to Ohio and United States (County Health Rankings, 2024).**

<b>Data</b>	<b>Data Years</b>	<b>Marion County</b>	<b>Ohio</b>	<b>United States</b>
<b>Life Expectancy</b>  Average number of years a person can expect to live.	2019-2021	75.6 years	76.5 years	78.5 years
<b>Disaggregated by Race/Ethnicity</b>				
Non-Hispanic Black	2019-2021	74.4 years	No data	No data
Non-Hispanic White	2019-2021	73.6 years	No data	No data
<b>Poor or Fair Health</b>  Percent adults reporting poor or fair health (age-adjusted).	2021	19%	16%	14%
<b>Infant Mortality</b>  Infant mortality (Number of all infant deaths before age 1, per 1,000 live births).	2015-2021	7 per 1,000 live births	7 per 1,000 live births	6 per 1,000 live births
<b>Child Mortality</b>  Number of deaths among children under 18 per 100,000 population.	2018-2021	50 per 100,000 people	60 per 100,000 people	50 per 100,000 people
<b>Poor Physical Health Days</b>  Average number of physically unhealthy days in past 30 days (age-adjusted).	2021	4.1 poor physical health days	3.6 poor physical health days	3.3 poor physical health days
<b>Poor Mental Health Days</b>  Average number of mentally unhealthy days in past 30 days (age-adjusted).	2021	6.1 poor mental health days	5.5 poor mental health days	4.8 poor mental health days

**Continuation of Appendix Table 11. Summary of Health Outcomes Data for Marion County compared to Ohio and United States (County Health Rankings, 2024).**

<b>Data</b>	<b>Data Years</b>	<b>Marion County</b>	<b>Ohio</b>	<b>United States</b>
<b>Low Birthweight</b>  Percent of live births with low birth weight (under 5 pounds, 8 ounces).	2016-2022	8% of babies had low birth weight	9% of babies had low birth weight	8% of babies had low birth weight
<b>Disaggregated by Race/Ethnicity</b>				
Hispanic (all races)	2016-2022	10%	No data	No data
Non-Hispanic Black	2016-2022	15%	No data	No data
Non-Hispanic two or more races	2016-2022	19%	No data	No data
Non-Hispanic White	2016-2022	8%	No data	No data
<b>Frequent Physical Distress</b>  Percent of adults reporting 14 or more days of poor physical health per month.	2021	13%	11%	10%
<b>Frequent Mental Distress</b>  Percent of adults reporting 14 or more days of poor mental health per month (age-adjusted).	2021	18%	17%	15%
<b>Diabetes Prevalence</b>  Percent of adults aged 20 and above with diagnosed diabetes (age-adjusted).	2021	12%	11%	10%
<b>HIV Prevalence</b>  Number of people aged 13+ years with HIV per 100,000 population.	2021	201 per 100,000 people	242 per 100,000 people	382 per 100,000 people

**Summary of Findings from Table 11.**

The top five leading causes of death in Marion County include (a) malignant neoplasms; (b) diseases of heart; (c) accidents; (d) COVID-19; and (e) chronic lower respiratory diseases. Rates of diabetes, frequent physical and mental distress and poor physical and mental health days were higher in Marion County compared to Ohio and United States.

**Appendix Table 12. Summary of Health Behaviors Data for Marion County compared to Ohio and United States (County Health Rankings, 2024).**

<b>Data</b>	<b>Data Years</b>	<b>Marion County</b>	<b>Ohio</b>	<b>United States</b>
<b>Adult Smoking</b>  Percent of adults who are current smokers (age-adjusted).	2021	24%	19%	15%
<b>Adult Obesity</b>  Percent of adults age 18+ with body mass index of 30+ kg/m <sup>2</sup> (age-adjusted).	2020	46%	38%	34%
<b>Food Environment Index</b>  Index of factors that contribute to a healthy food environment, from 0 (worst) to 10 (best).	2019 and 2021	6.6 out of 10	7 out of 10	7.7 out of 10
<b>Physical Inactivity</b>  Percent of adults age 18+ reporting no leisure-time physical activity (age-adjusted).	2021	31%	25%	23%
<b>Access to Exercise Opportunities</b>  Percent of population with adequate access to locations for physical activity.	2020, 2022 and 2023	81%	84%	84%
<b>Excessive Drinking</b>  Percent of adults reporting binge or heavy drinking (age-adjusted).	2021	18%	20%	18%
<b>Alcohol-impaired Driving Deaths</b>  Percent of driving deaths with alcohol involvement.	2017-2021	25%	32%	26%

**Continuation of Appendix Table 12. Summary of Health Behaviors Data for Marion County compared to Ohio, and United States (County Health Rankings, 2024).**

<b>Data</b>	<b>Data Years</b>	<b>Marion County</b>	<b>Ohio</b>	<b>United States</b>
<b>Sexually Transmitted Infections</b>  Number of newly diagnosed chlamydia cases per 100,000 population.	2021	438 per 100,000 people	479.8 per 100,000 people	495 per 100,000 people
<b>Teen Births</b>  Number of births per 1,000 female population ages 15-19.	2016-2022	38 per 1,000 females ages 15-19	18 per 1,000 females ages 15-19	17 per 1,000 females ages 15-19
<b>Disaggregated by Race/Ethnicity</b>				
Hispanic (all races)	2016-2022	50 per 1,000 females ages 15-19	No data	No data
Non-Hispanic two or more races	2016-2022	59 per 1,000 females ages 15-19	No data	No data
Non-Hispanic White	2016-2022	37 per 1,000 females ages 15-19	No data	No data
<b>Food Insecurity</b>  Percent of population who did not have adequate access to food.	2021	14%	12%	10%
<b>Limited Access to Healthy Foods</b>  Percent of population who are low-income and do not live close to a grocery store).	2019	14%	7%	6%
<b>Drug Overdose Deaths</b>  Number of drug poisoning deaths per 100,000 population).	2019-2021	53 deaths per 100,000 people	42 deaths per 100,000 people	27 deaths per 100,000 people
<b>Insufficient Sleep</b>  Percent of adults with fewer than 7 hours of sleep on average (age-adjusted).	2020	41%	36%	33%

**Summary of Findings from Table 12.**

Relative to Ohio and United States, Marion County residents have higher rates of adult smoking, adult obesity, physical inactivity, food insecurity, limited access to healthy foods, drug overdose deaths and insufficient sleep. Teen births among Hispanics and Non-Hispanic two or more races have higher teen birth rates compared to Non-Hispanic White.

**Appendix Table 13. Summary of Clinical Care Data for Marion County compared to Ohio and United States (County Health Rankings, 2024).**

<b>Data</b>	<b>Data Years</b>	<b>Marion County</b>	<b>Ohio</b>	<b>United States</b>
<b>Uninsured</b> Percent of population under age 65 without health insurance	2021	7%	8%	10%
<b>Uninsured Adults</b> Percent of adults under age 65 without health insurance	2021	8%	9%	12%
<b>Uninsured Children</b> Percent of children under age 19 without health insurance	2021	4%	5%	5%
<b>Primary Care Physicians</b> Ratio of population to primary care physicians	2021	3,630 people to 1 primary care physician	1,330 people to 1 primary care physician	1,330 people to 1 primary care physician
<b>Other Primary Care Providers</b> Ratio of population to other primary care providers (Nurse practitioners, physician assistants, and clinical nurse specialists)	2023	750 people to 1 other primary care provider (nurse practitioners, physician assistants, and clinical nurse specialists)	710 people to 1 other primary care provider (nurse practitioners, physician assistants, and clinical nurse specialists)	760 people to 1 other primary care provider (nurse practitioners, physician assistants, and clinical nurse specialists)
<b>Dentists</b> Ratio of population to dentists	2022	1,700 people to 1 dentist	1,530 people to 1 dentist	1,360 people to 1 dentist
<b>Mental Health Providers</b> Ratio of population to mental health providers	2023	470 people to 1 mental health provider	310 people to 1 mental health provider	320 people to 1 mental health provider

**Continuation of Appendix Table 13. Summary of Clinical Care Data for Marion County compared to Ohio and United States (County Health Rankings, 2024).**

Data	Data Years	Marion County	Ohio	United States
<b>Mammography Screening</b>  (Percent of female Medicare enrollees ages 65-74 that received an annual mammography screening).	2021	49%	46%	43%
<b>Disaggregated by Race/Ethnicity</b>				
Non-Hispanic Black	2021	44%	—	—
Non-Hispanic White	2021	49%	—	—
<b>Flu Vaccinations</b>  Percent of fee-for-service Medicare enrollees that had an annual flu vaccination.	2021	51%	49%	46%
<b>Disaggregated by Race/Ethnicity</b>				
Asian	2021	67%	—	—
Non-Hispanic Black	2021	37%	—	—
Non-Hispanic White	2021	51%	—	—

**Findings from Appendix Table 13.**

There is a need for more primary care physicians in Marion County, Ohio. There is a need to promote the importance of flu vaccinations among people from the Non-Hispanic Black communities.

**Appendix Table 14. Summary of Social and Economic Factors (Social Determinants of Health) for Marion County compared to Ohio and U.S. (County Health Rankings, 2024).**

Data	Data Years	Marion County	Ohio	United States

<b>Median Household Income</b>  Half of households in a County earn more and half of households earn less.	2018-2022; 2022	\$59,000	\$65,800	\$74,800
<b>Aggregated by Race and Ethnicity</b>				
American Indian and Alaska Native	2018-2022; 2022	\$11,300	No data	No data
Black	2018-2022; 2022	\$40,900	No data	No data
White	2018-2022; 2022	\$56,400	No data	No data
<b>Residential Segregation between Black and White residents</b>  Index of dissimilarity where higher values indicate greater residential segregation.	2018-2022	Index of 69  0 means no segregation and 100 means complete segregation	Index of 70  0 means no segregation and 100 means complete segregation.	Index of 63  0 means no segregation and 100 means complete segregation.
<b>Homicides</b>  Number of deaths due to homicide per 100,000 population.	2015-2021	4 homicide deaths per 100,000 people	7 homicide deaths per 100,000 people	6 homicide deaths per 100,000 people
<b>Suicides</b>  Number of deaths due to suicide per 100,000 population (age-adjusted).	2017-2021	19 per 100,000 people	15 per 100,000 people	14 per 100,000 people
<b>Firearm Fatalities</b>  Number of deaths due to firearms per 100,000 population.	2017-2021	14 per 100,000 people	14 per 100,000 people	13 per 100,000 people
<b>Juvenile Arrests</b>  Rate of delinquency cases per 1,000 juveniles.	2021	31 juvenile delinquency court cases per 1,000 youths	22 juvenile delinquency court cases per 1,000 youths	No data

**Continuation of Appendix Table 14. Summary of Social and Economic Factors (Social Determinants of Health) for Marion County compared to Ohio and United States (County Health Rankings, 2024).**

<b>Data</b>	<b>Data Years</b>	<b>Marion County</b>	<b>Ohio</b>	<b>United States</b>
<b>Motor Vehicle Crash Deaths</b>  Number of motor vehicle crash deaths per 100,000 population.	2015-2021	16 per 100,000 people	11 per 100,000 people	12 per 100,000 people
<b>Severe Housing Problems</b>  Percent of households with at least 1 of 4 housing problems: overcrowding, high housing costs, lack of kitchen facilities, or lack of plumbing facilities.	2016-2020	12% of households experienced at least 1 of the following housing problems: (a) overcrowding; (b) high housing costs; (c) lack of kitchen facilities; and (d) lack of plumbing facilities	13% of households experienced at least 1 of the following housing problems: (a) overcrowding; (b) high housing costs; (c) lack of kitchen facilities; and (d) lack of plumbing facilities.	17% of households experienced at least 1 of the following housing problems: (a) overcrowding; (b) high housing costs; (c) lack of kitchen facilities; and (d) lack of plumbing facilities.

**Summary of Findings from Appendix Table 14.**

Median household income is lower in Marion County compared to Ohio and United States.

Rates of injury deaths, suicides and motor vehicle crash deaths were higher in Marion County compared to Ohio and United States. Injury deaths were greater among Non-Hispanic Whites compared to Non-Hispanic Blacks.

Marion County third graders did not perform as well as Ohio and United States in language arts and math. Additionally, performance of Black and Hispanic third graders were inferior compared to White third graders in language arts and math.

<b>Uterine Cancer Mortality Rates (Deaths)</b>  Average annual age-adjusted mortality rates per 100,000 population	2016-2020	No data	5.3 per 100,000 people	5.1 per 100,000 people

**Summary of Findings from Appendix Table 16.**

**Cancer Cases and Deaths in Ohio (2016-2020)** – Cancer is the second leading cause of death in Ohio. Cancer accounts for 1 in 5 deaths in Ohio. Four out of 10 people in Ohio will be diagnosed with cancer during their lifetime.

**New Invasive Cancer Cases in Marion County (2016-2020)** – On average, 426 new invasive cancer cases per year were diagnosed among Marion County residents. The top 5 new invasive cancer cases in Marion County were lung and bronchus cancer, female breast cancer, prostate cancer, colon and rectum cancer, and bladder cancer. These top five cancers represented 56% of all new invasive cancer cases. The cancer incidence rate (new cases) for all sites/types of cancer in Marion County was higher compared to Ohio and United States rate. Males in Marion County, Ohio and U.S. had slightly higher cancer incidence rates (based on new cancer cases) compared to females.

**Cancer Deaths in Marion County (2016-2020)** – On average, 156 cancer deaths per year were diagnosed among Marion County residents. The top 5 leading causes of cancer death in Marion County were lung and bronchus cancer, female breast cancer, prostate cancer, colon and rectum cancer, and bladder cancer. These top 5 causes of cancer deaths represented 56% of all cancer deaths. The cancer death rate for all sites/types of cancer in Marion County was higher compared to Ohio rate and United States rate. Males in Marion County, Ohio and United States had higher cancer death rates compared to females.

**Appendix Table 17. Summary Data on Recommended Cancer Screenings Tests in Marion County compared to Ohio, and United States (Ohio Department of Health, 2023).**

Cancer Screenings	Data Years	Marion County	Ohio	United States
Pap Test in the past three years, women ages 21-65.	2018-2020	80%	77.3%	78.7%
Colorectal cancer screening, ages 50-75.	2018-2020	63.2%	70.2%	70.8%
Mammogram in the past two years, women ages 50-74.	2018-2020	82.2 %	77.9%	78.6%

**Summary of Findings from Appendix Table 17.**

In 2018-2020, the percent of Pap testing, and mammograms in Marion County were similar to Ohio and United States. However, colorectal cancer screening was lower in Marion County compared to Ohio and United States. Approximately 8 in 10 women within specific age groups in Marion County have completed Pap tests and mammogram screenings. Approximately 6 in 10 persons in Marion County have completed colon and rectal cancer screenings.

**Appendix Table 18. Summary Data on Prevalence of Modifiable Risk Factors of Developing Cancer in Marion County compared to Ohio and United States (Ohio Department of Health, 2023).**

<b>Modifiable Risk factors of Developing Cancer</b>	<b>Data Years</b>	<b>Marion County</b>	<b>Ohio</b>	<b>United States</b>
Current Smoker	2020	26.7%	20.2%	16%
Obese	2020	40.2%	35.8%	32%
Physically Inactive	2020	30.2%	23.5%	22%
Excessive Drinking	2020	17.7%	19%	19%

**Summary of Findings from Appendix Table 18**

In 2020, the prevalence rates of smoking, obesity, lack of physical activity were consistently higher in Marion County compared to Ohio and United States. Addressing these cancer-related modifiable risk factors in Marion County could reduce cancer deaths. The rates of excessive drinking were similar among Marion County, Ohio and United States.

# Appendix C. Summary of Input from Persons Who Represent the Broad Interests of the Community Served

## Center Street Community Health Center

  - + Partnerships with industry to foster engineering and manufacturing technology and other projects.
  - + Partnership with the Marion County community, including Popcorn Festival Parade and other outreach activities.

# Appendix D. Documentation of Program Impacts from the Community Health Needs Assessment and Implementation Strategy Adopted in 2022 by OhioHealth Marion General Hospital

## 2022 Marion County Priority Health Need 1: Mental Health and Addiction (MHA)

**MHA – 1. Continue inpatient and outpatient behavioral healthcare and cross-referral with community agencies** — Continue to provide inpatient and outpatient behavioral healthcare at Marion General Hospital, primary care and other ambulatory clinics and promote partnerships with community agencies to ensure effective referral and cross-referral system.

### OhioHealth Marion General Hospital's Impacts related to MHA – 1.

During Fiscal Years 2023 to 2025, OhioHealth Marion General Hospital continued to provide inpatient and outpatient behavioral healthcare and cross-referral with community agencies. Supporting data on diagnoses of patients served in Fiscal Years 2023 and 2024 are presented in **Appendix Tables 19 and 20**, respectively. Among hospitalized patients at the OhioHealth Marion General Hospital during Fiscal Years 2023 and 2024, **Appendix Table 21** shows the number of referrals and unique count of patients referred to OhioHealth Behavioral Health.

**Appendix Tables 22 and 23** show the count and percent of patient visits in Fiscal Years 2023 and 2024, respectively, to the OhioHealth Marion General Hospital Outpatient Behavioral Health that offered Partial Hospitalization Program. The OhioHealth Partial Hospitalization Program serves patients with mental and/or behavioral health primary diagnoses. The Clinic is located at 1000 McKinley Park Drive, Marion, Ohio 43302.

**Appendix Tables 24 and 25** show the count and percent of visits to the OhioHealth Physician Group Behavioral Health that offered psychiatric and care management services to patients with mental and/or behavioral health primary diagnoses. The Clinic is located at 990 S. Prospect Street Suite 3, Marion, Ohio 43302.

**Appendix Tables 26 and 27** show the count and percent of patients served in Fiscal Years 2023 and 2024, respectively, by the Marion Area Physician Obstetrics and Gynecology in Marion County, which is an OhioHealth designated Behavioral Health Integration (BHI) Clinic. The BHI Clinic provided SBIRT (Screening, Brief Intervention, and Referral to Treatment) to patients with mental and/or behavioral health diagnoses who were referred by providers. The Clinic is located at 1040 Delaware Avenue, Marion, Ohio 43302 (OhioHealth, 2015-2024).

**Appendix Tables 28 and 29** show the count and percent of patients served in Fiscal Years 2023 and 2024, respectively, by the OhioHealth Physician Group Primary Care in Marion County, which is an OhioHealth designated Behavioral Health Integration (BHI) Clinic. The BHI Clinic provided SBIRT (Screening, Brief Intervention, and Referral to Treatment) to patients with mental and/or behavioral health diagnoses. The Clinic is located at 1050 Delaware Avenue, Marion, Ohio 43302.

**Appendix Tables 30 and 31** show the count and percent of patients served in Fiscal Years 2023 and 2024, respectively, by the OhioHealth Physician Group (OPG) Primary Care-Independence Avenue in Marion County. This OPG Clinic is a designated Behavioral Health Integration (BHI) Clinic, which provides SBIRT (Screening, Brief Intervention, and Referral to Treatment) to patients with mental and/or behavioral health diagnoses. The Clinic is located at 1130 Independence Avenue, Marion, Ohio 43302.

**Appendix Tables 32 and 33** show the count and percent of patients served in Fiscal Years 2023 and 2024, respectively, by the OhioHealth Physician Group (OPG) Primary Care- Marion Medical Campus in Marion County. This OPG Clinic is a designated Behavioral Health Integration (BHI) Clinic, which provides SBIRT (Screening, Brief Intervention, and Referral to Treatment) to patients with mental and/or behavioral health diagnoses. The Clinic is located at Marion Medical Campus, 1040 Delaware Avenue, Marion, Ohio 43302.

**Appendix Tables 34 and 35** show the count and percent of patients served Fiscal Years 2023 and 2024, respectively, by the OhioHealth Physician Group Primary Care- S Prospect Avenue Suite 1, in Marion County. This Clinic is a designated OhioHealth Behavioral Health Integration Clinic, which provides SBIRT (Screening, Brief Intervention, and Referral to Treatment) to patients with mental and/or behavioral health diagnoses. The Clinic is located at 980 S. Prospect Avenue, Suite 1, Marion, Ohio 43302.

**Appendix Tables 36 and 37** show the count and percent of patients served Fiscal Years 2023 and 2024, respectively, by the OhioHealth Physician Group Primary Care- University Drive, in Marion County. This Clinic is a designated OhioHealth Behavioral Health Integration Clinic, which provides SBIRT (Screening, Brief Intervention, and Referral to Treatment) to patients with mental and/or behavioral health diagnoses. The Clinic is located at 130 University Drive, Suite 1100, Marion, Ohio 43302.

**Appendix Table 19. Summary of patients hospitalized at the OhioHealth Marion General Hospital in Fiscal Year 2023 (7/1/2022 to 6/30/2023) with diagnoses of Mental, Behavioral, and Neurodevelopmental Disorders.**

<b>Mental, Behavioral, and Neurodevelopmental Disorders (ICD-10-CM)</b>	<b>Count of Patients Served in Fiscal Year 2023</b>	<b>Percent of Patients Served in Fiscal Year 2023 (N = 8,820 patients)</b>
Mental disorders due to known physiological conditions (F01-F09)	819 patients	9.30%
Mental and behavioral disorders due to psychoactive substance use (F10-F19)	1649 patients	18.70%
Schizophrenia, schizotypal, delusional, and other non-mood psychotic disorders (F20-F29)	459 patients	5.20%
Mood [affective] disorders (F30-F39)	3575 patients	40.50%
Anxiety, dissociative, stress-related, somatoform and other nonpsychotic mental disorders (F40-F48)	3650 patients	41.40%
Behavioral syndromes associated with physiological disturbances and physical factors (F50-F59)	401 patients	4.50%
Disorders of adult personality and behavior (F60-F69)	205 patients	2.30%
Intellectual disabilities (F70-F79)	77 patients	0.87%
Pervasive and specific developmental disorders (F80-F89)	76 patients	0.86%
Behavioral and emotional disorders with onset usually occurring in childhood and adolescence (F90-F98)	333 patients	3.80%
Unspecified mental disorder (F99)	23 patients	0.26%

**Appendix Table 20. Summary of patients hospitalized at the OhioHealth Marion General Hospital in Fiscal Year 2024 (7/1/2023 to 6/30/2024) with diagnoses of Mental, Behavioral, and Neurodevelopmental Disorders.**

<b>Mental, Behavioral, and Neurodevelopmental Disorders (ICD-10-CM)</b>	<b>Count of Patients Served in FY 2024</b>	<b>Percent of Patients Served in FY 2024 (N = 8,657 patients)</b>
Mental disorders due to known physiological conditions (F01-F09)	800 patients	9.20%
Mental and behavioral disorders due to psychoactive substance use (F10-F19)	1687 patients	19.50%
Schizophrenia, schizotypal, delusional, and other non-mood psychotic disorders (F20-F29)	482 patients	5.60%
Mood [affective] disorders (F30-F39)	3603 patients	41.60%
Anxiety, dissociative, stress-related, somatoform and other nonpsychotic mental disorders (F40-F48)	3770 patients	43.50%
Behavioral syndromes associated with physiological disturbances and physical factors (F50-F59)	421 patients	4.90%
Disorders of adult personality and behavior (F60-F69)	260 patients	3%
Intellectual disabilities (F70-F79)	75 patients	0.87%
Pervasive and specific developmental disorders (F80-F89)	86 patients	0.99%
Behavioral and emotional disorders with onset usually occurring in childhood and adolescence (F90-F98)	370 patients	4.30%
Unspecified mental disorder (F99)	29 patients	0.34%

**Appendix Table 21. Summary of provider referrals of OhioHealth Marion General Hospital hospitalized patients to the OhioHealth Behavioral Health Department during Fiscal Years 2023 (7/1/2022 to 6/30/2023) and Fiscal Year 2024 (7/1/2023 to 6/30/2024).**

Admitting Hospital	Fiscal Year 2023 Total Count of Referrals	Fiscal Year 2023 Unique Count of Patients Referred to OhioHealth Behavioral Health	Fiscal Year 2024 Total Count of Referrals	Fiscal Year 2024 Unique Count of Patients Referred to OhioHealth Behavioral Health
OhioHealth Marion General Hospital	45 referrals	42 patients	50 referrals	38 patients

**Appendix Table 22. Top Primary Diagnoses of Patients served by the Marion General Hospital Outpatient Behavioral Health with Access to Partial Hospitalization Program (PHP) in Fiscal Year 2023 (7/1/2022 to 6/30/2023). The Clinic is located at 1000 McKinley Park Drive, Marion, Ohio 43302.**

<b>Primary Diagnoses</b>	<b>Count of Completed Visits in Fiscal Year 2023</b>	<b>Percent of Completed Visits in Fiscal Year 2023 (N=2,181 visits)</b>
Major depressive disorder, recurrent severe without psychotic features ( ICD-10-CM: F33.2 )	576 visits	26.40%
Bipolar disorder, unspecified ( ICD-10-CM: F31.9 )	291 visits	13.30%
Major depressive disorder, recurrent, moderate ( ICD-10-CM: F33.1 )	181 visits	8.30%
Bipolar II disorder ( ICD-10-CM: F31.81 )	130 visits	6%
Post-traumatic stress disorder, unspecified ( ICD-10-CM: F43.10 )	124 visits	5.70%
Bipolar disorder, current episode mixed, severe, without psychotic features ( ICD-10-CM: F31.63 )	78 visits	3.60%
Bipolar disorder, current episode depressed, severe, without psychotic features ( ICD-10-CM: F31.4 )	54 visits	2.50%
Major depressive disorder, recurrent, severe with psychotic symptoms ( ICD-10-CM: F33.3 )	52 visits	2.40%
Schizoaffective disorder, bipolar type ( ICD-10-CM: F25.0 )	50 visits	2.30%
Anxiety disorder, unspecified ( ICD-10-CM: F41.9 )	47 visits	2.20%
Bipolar disorder, current episode manic severe with psychotic features ( ICD-10-CM: F31.2 )	47 visits	2.20%
Major depressive disorder, recurrent, unspecified ( ICD-10-CM: F33.9 )	46 visits	2.10%

**Continuation of Appendix Table 22. Top Primary Diagnoses of Patients served by the Marion General Hospital Outpatient Behavioral Health with Access to Partial Hospitalization Program (PHP) in Fiscal Year 2023 (7/1/2022 to 6/30/2023). The Clinic is located at 1000 McKinley Park Drive, Marion, Ohio 43302.**

<b>Primary Diagnoses</b>	<b>Count of Completed Visits in Fiscal Year 2023</b>	<b>Percent of Completed Visits in Fiscal Year 2023 (N=2,181 visits)</b>
Bipolar disorder, current episode mixed, severe, with psychotic features ( ICD-10-CM: F31.64 )	45 visits	2.10%
Schizoaffective disorder, depressive type ( ICD-10-CM: F25.1 )	44 visits	2%
Depression, unspecified ( ICD-10-CM: F32.A )	41 visits	1.90%
Bipolar disorder, current episode depressed, moderate ( ICD-10-CM: F31.32 )	39 visits	1.80%
Panic disorder (episodic paroxysmal anxiety) ( ICD-10-CM: F41.0 )	38 visits	1.70%
Major depressive disorder, recurrent, mild ( ICD-10-CM: F33.0 )	33 visits	1.50%
Agoraphobia with panic disorder ( ICD-10-CM: F40.01 )	26 visits	1.20%
Schizoaffective disorder, unspecified ( ICD-10-CM: F25.9 )	20 visits	0.92%

**Appendix Table 23. Top Primary Diagnoses of Patients served by the Marion General Hospital Outpatient Behavioral Health with Access to Partial Hospitalization Program (PHP) in Fiscal Year 2024 (7/1/2023 to 6/30/2024). The Clinic is located at 1000 McKinley Park Drive, Marion, Ohio 43302.**

<b>Primary Diagnoses</b>	<b>Count of Completed Visits in Fiscal Year 2024</b>	<b>Percent of Completed Visits in Fiscal Year 2024 (N=1,808 visits)</b>
Major depressive disorder, recurrent severe without psychotic features ( ICD-10-CM: F33.2 )	725 visits	40.10%
Bipolar disorder, unspecified ( ICD-10-CM: F31.9 )	215 visits	11.90%
Bipolar disorder, current episode mixed, severe, without psychotic features ( ICD-10-CM: F31.63 )	142 visits	7.90%
Anxiety disorder, unspecified ( ICD-10-CM: F41.9 )	107 visits	5.90%
Bipolar II disorder ( ICD-10-CM: F31.81 )	103 visits	5.70%
Depression, unspecified ( ICD-10-CM: F32.A )	89 visits	4.90%
Bipolar disorder, current episode depressed, severe, without psychotic features ( ICD-10-CM: F31.4 )	87 visits	4.80%
Major depressive disorder, recurrent, severe with psychotic symptoms ( ICD-10-CM: F33.3 )	68 visits	3.80%
Major depressive disorder, recurrent, moderate ( ICD-10-CM: F33.1 )	57 visits	3.20%
Schizoaffective disorder, depressive type ( ICD-10-CM: F25.1 )	52 visits	2.90%
Post-traumatic stress disorder, unspecified ( ICD-10-CM: F43.10 )	44 visits	2.40%
Bipolar disorder, current episode manic severe with psychotic features ( ICD-10-CM: F31.2 )	27 visits	1.50%

- MHA – 3. Continue participation in the “Marion County Medication Disposal Day”** — Continue participation and engagement in the planning, coordination and implementation of Marion County Medication Disposal Day events and engagement in community meetings related to increasing access to safe disposal of prescription drugs and improve education and awareness on proper disposal of prescription drugs. Participation in the “Marion County Medication Disposal Day”.

### OhioHealth Marion General Hospital Impacts Related to MHA 3 (Continue participation in the “Marion County Medication Disposal Day”).

**Appendix Tables 42 and 43** summarizes the Drug Take Back Day events during Fiscal Years 2023 and 2024, respectively, which were hosted by the OhioHealth Marion General Hospital in collaboration with various community partners. The OhioHealth Pharmacist Dan Sheridan provided leadership for the Drug Take Back Day events.

Moreover, the OhioHealth Pharmacist Dan Sheridan, pharmacist represented OhioHealth Marion General Hospital in the Drug-Free Marion Coalition, which is coordinated and led by the Marion Crawford Prevention Programs. See **Appendix Table 44** for a summary of activities by the Drug-Free Marion Coalition.

The OhioHealth Pharmacist, Dan Sheridan, also represented OhioHealth in the Marion County Suicide and Overdose Fatality Review Committee, where community stakeholders review the causes and demographic profile of Marion County residents who died from suicide or unintentional drug overdose. **Appendix Tables 45 and 46** show the counts and age-adjusted death rates from suicide and overdose among Marion County residents, respectively,

The OhioHealth Marion General Hospital's Emergency Department continues to provide emergency medical services to patients who presented with diagnosis of overdose with opioids, benzodiazepines, heroin, Cannabis (marijuana), fentanyl, heroin, and stimulants. See **Appendix Tables 47 to 48** count and percent of patients with overdose diagnoses.

**Appendix Table 42. Summary of Drug Take Back Days Hosted by OhioHealth, in collaboration with various community partners in Fiscal Year 2023 (7/1/2022 to 6/30/2023).**

Meeting Dates	Focus Area of Community Discussions
7/12/2022	OhioHealth Marion General Hospital's Pharmacist Dan Sheridan served as the Vice Chair of the Drug-Free Marion Executive Committee.
3/7/2023	"Handle with Care" program for traumatized children and plans for future activities.
4/4/2023	"Handle with Care" program for traumatized children and plans for future activities.
8/1/2023	Drug-Free Marion Coalition Sponsored Family Night
9/5/2023	Drug-Free Marion Coalition Sponsored Family Night

**Appendix Table 45. Summary of suicide rates in Marion County compared to Ohio (Ohio Department of Health, 2023). OhioHealth Marion General Hospital's pharmacist provided medication expertise to the community collaborative team led by Marion Public Health, Marion County Coroner's Office, and Marion County Sheriff's Office.**

	Suicide Death Count			Unintentional Drug Overdose Age-Adjusted Death Rate (per 100,000 people)	
	2020	2021	2022	2022	2020-2022
Marion County	11 persons	12 persons	14 persons	20 per 100,000 people	17.9 per 100,000 people
Ohio	1,642 persons	1,766 persons	1,797 persons	15 per 100,000 people	14.4 per 100,000 people

**Appendix Table 46. Summary of overdose rates in Marion County compared to Ohio from 2020-2022 (Ohio Department of Health, 2023). OhioHealth Marion General Hospital's pharmacist provided medication expertise to the community collaborative team led by Marion Public Health, Marion County Coroner's Office, and Marion County Sheriff's Office.**

	Unintentional Drug Overdose Death Count			Unintentional Drug Overdose Age-Adjusted Death Rate (per 100,000 people)	
	2020	2021	2022	2022	2020-2022
Marion County	39 persons	32 persons	38 persons	61.4 per 100,000 people	58 per 100,000 people
Ohio	5,017 persons	5,174 persons	4,915 persons	43.6 per 100,000 people	45 per 100,000 people

**Appendix Table 47. Summary of count and percent of patients served by the OhioHealth Marion General Hospital Emergency Department in Fiscal Year 2023 (7/1/2022 to 6/30/2023) who had diagnoses of overdose of opioids, benzodiazepines, Cannabis (marijuana), fentanyl, heroin, and stimulants. The ICD-10 diagnoses codes were based on the Centers for Disease Control and Prevention National Center for Health Statistics (2023).**

<b>Diagnoses</b>	<b>Fiscal Year 2023 Count of Patients Seen at the Marion General Hospital Emergency Department</b>	<b>Fiscal Year 2023 Percent of Patients Seen at the Marion General Hospital Emergency Department (N=22,379 patients)</b>
Overdose with opioids that may be natural (morphine, opium, heroin), synthetic (fentanyl, methadone), or semi-synthetic (oxycodone, hydrocodone, hydromorphone)	129 patients	0.58%
Overdose with benzodiazepines, including sedatives, hypnotic, and anxiolytic substances that slow the central nervous system	11 patients	0.05%
Overdose with marijuana	2 patients	0.01%
Overdose with fentanyl and fentanyl analogues	0 patient	0%
Overdose with heroin	0 patient	0%
Overdose with stimulants (for example, psychostimulants, methamphetamines, amphetamines, caffeine, cocaine, other stimulants)	52 patients	0.23%

**Appendix Table 48. Summary of count and percent of patients served by the OhioHealth Marion General Hospital Emergency Department in Fiscal Year 2024 (7/1/2023 to 6/30/2024) who had diagnoses of overdose of opioids, benzodiazepines, Cannabis (marijuana), fentanyl, heroin, and stimulants. The ICD-10 diagnoses codes were based on the Centers for Disease Control and Prevention National Center for Health Statistics (2023).**

<b>Diagnoses</b>	<b>Fiscal Year 2024 Count of Patients Seen at the Marion General Hospital Emergency Department</b>	<b>Fiscal Year 2024 Percent of Patients Seen at the Marion General Hospital Emergency Department (N=22,475 patients)</b>
Overdose with opioids that may be natural (morphine, opium, heroin), synthetic (fentanyl, methadone), or semi-synthetic (oxycodone, hydrocodone, hydromorphone)	89 patients	0.40%
Overdose with sedatives, hypnotic, and anxiolytic substances that slow the central nervous system	14 patients	0.06%
Overdose with marijuana	4 patients	0.02%
Overdose with fentanyl and fentanyl analogues	0 patient	0.00%
Overdose with heroin	0 patient	0.00%
Overdose with stimulants (for example, psychostimulants, methamphetamines, amphetamines, caffeine, cocaine, other stimulants)	53 patients	0.24%

- MHA – 4. Continue the Speakers Bureau and outreach on mental health and addiction** — Continue to provide speakerships, presentations, and outreach to the Marion County community, including workplace environments, focused on various aspects of mental health and addiction and how to improve overall health.

### OhioHealth Marion General Hospital's Impacts related to MHA 4 (Continue the Speakers Bureau and outreach on mental health and addiction).

**Appendix Tables 49 and 50** show the speakerships provided by OhioHealth Marion General Hospital healthcare providers in Fiscal Years 2023 and 2024, respectively. The speakerships on cancer, brain health, stroke, and bone health included discussions on mental health and wellness as part of patient empowerment to manage their risk factors to avert diseases.

**Appendix Table 49. Summary of OhioHealth Marion General Hospital speakerships in Fiscal Year 2023 (7/1/2022 to 6/30/2023) that included discussion about mental health and wellness.**

<b>Date</b>	<b>In-Person or Virtual Talk</b>	<b>Host Organization</b>	<b>Address of Organization</b>	<b>Topic of Talk</b>	<b>Count of Persons Served</b>
11/15/2022	In-Person	Marion Rotary Club	278 Barks Rd W, Marion, OH 43302	Overview of OhioHealth Cancer Services	20 persons
3/6/2023	In-Person	Marion Public Library	445 E Church St, Marion, OH 43302	Brain Health: Keeping your Brain healthy as you Age	75 persons
5/10/2023	In-Person	Pleasant Senior Center	1036 Owens Road West, Marion, Ohio 4330	Prevention and Overview of Stroke	50 persons

**Appendix Table 50. Summary of OhioHealth Marion General Hospital speakerships in Fiscal Year 2024 (7/1/2023 to 6/30/2024) that included discussion about mental health and wellness.**

Date	In-Person or Virtual Talk	Host Organization	Address of Organization	Topic of Talk	Count of Persons Served
5/22/2024	In-Person	Marion Family YMCA	645 Barks Road East, Marion, OH 43302	Bone Health, Osteoporosis, Osteopenia, and Movement Disorders (Including Mental and wellness)	20 persons

- MHA – 5. Continue participation in the Marion Crawford Prevention Programs** — Continue to partner with the Marion Crawford Prevention Programs that coordinates Drug-Free Marion, a community coalition that focuses in reducing youth involvement in alcohol, marijuana, and vaping. Drug Free Marion’s mission is “to empower and engage community members to address substance abuse, misuse, and abuse through prevention, advocacy, collaboration, and education.”

This action (**MHA – 5**) aligns with Ohio’s 2020-2022 State Health Improvement Plan (SHIP). Refer to Table 2 for additional information. Both OhioHealth Marion General Hospital and Marion Public Health will continue to be significantly involved in Drug Free Marion as a strategy to address mental health and addiction in Marion County.

## OhioHealth Marion General Hospital’s Impacts related to MHA 5 (Continue participation in the Marion Crawford Prevention Programs)

OhioHealth Marion General Hospital’s partnerships with the Marion Crawford Prevention Program include Drug-Free Marion and helping ensure public awareness of community speakerships and outreach related to youth mental health and substance use prevention. More specifically, the Marion Crawford Prevention Programs focus on prevention of alcohol, marijuana, and vaping use among youth.

The OhioHealth Marion General Hospital providers and staff are also aware of various education programs of the Marion Crawford Prevention Programs which offers prevention programs and services to address substance abuse (alcohol, marijuana, and vaping) for students in Marion County and Crawford County (Marion-Crawford Prevention Programs, n.d.).

Examples of programs and services of Marion-Crawford Prevention Programs include but not limited to:

- + **Youth-led Prevention Strategies** – include Junior Teen Institute and Teen Institute that are offered in schools in Marion and Crawford Counties.
- + **Mental Health First Aid for Teens** – trains teens in **ALGEE**, which stands for (a) **A**ssessing for risk of suicide or self-harm; (b) **L**istening nonjudgmentally; (c) **G**ive reassurance and information; (d) **E**ncourage person to seek professional help; and (e) **E**ncourage self-help and other support strategies (National Council for Mental Wellbeing, 2024).
- + **QPR (Question, Persuade, Refer) Gatekeeper Training (Suicide Prevention)** – aims to reduce suicidal behaviors by training gatekeepers provide emergency response to someone in crisis (QPR Institute, n.d.).
- + **Working Minds Suicide Prevention Training** – suitable for people in the workforce so they could identify suicidal ideation in the workplace, enable open dialogue, and prevent suicide. The new name of Working Minds is VitalCog (The Regents of the University of Colorado, 2019).
- + **Strengthening Families** – multi-session family program that aims to reduce youth substance abuse and enhance family closeness (Strengthening Families Program, 2024).
- + **Hidden in Plain Sight (HIPS)** – gives parents a tour of a virtual bedroom and demonstrated hidden and not so hidden items in the room that could show signs of risky behaviors, substance use and mental illness. After the tour parents are educated on the mental health and addiction issues in Marion County and how to nonjudgmentally speak with their children about these conditions. Parents are given information on available community resources (Marion-Crawford Prevention Programs, n.d.).
- + **PAX Tools** – assist parents and youth workers deal help and support children regulate their actions and behaviors so they will experience positive development (Marion-Crawford Prevention Programs, n.d.).
- + **School-Based Services** – prevention programs are delivered in classrooms settings. Topics include (a) development of one’s assets; (b) drug-specific education; (c) alcohol and tobacco advertising; (d) bullying; (e) effective communications; (f) self-esteem; (g) making decisions; and (h) family-based relationships.
- + **Youth-Based Services** – The Marion Crawford Prevention Programs offers Choices for Life to serve youth who have violated their school’s code of conduct or athletic code or substance abuse policy (Marion-Crawford Prevention Programs, n.d.).

## OhioHealth Marion General Hospital Alignment with Ohio's 2020-2022 State Health Improvement Plan Related to MHA – 5 (Continue participation in the Marion Crawford Prevention Programs)

**Appendix Tables 51 to 72** show findings from the Ohio Healthy Youth Environments Survey (OHYES!) that was conducted in local school districts in Marion County and in Ohio. The OHYES! gauges the prevalence of behaviors and experiences that may serve as risk factors or protective factors for youth health and wellness. OHYES! collects data on the following measures:

- Demographics.
- Alcohol & Tobacco/Vapor Products.
- Marijuana.
- Prescription Misuse & Illicit Drugs.
- Bullying, Safety & School Climate.
- Physical Health & Well-being.
- Mental Health & Suicide.
- Gambling.
- Parental Attitudes of Substance Use.
- Community, Family & Peer Factors.
- School Success.

Findings from **Appendix Tables 51 to 72** showed the following:

- **Adverse Childhood Experiences (ACEs) –**
  - + 58.73% of Marion County students were exposed to emotional abuse compared to 61.05% of Ohio students were exposed to emotional abuse.
  - + 34.96% of Marion County students and 31.51% of Ohio students reported that household mental illness posed a challenge to them.
  - + 7.12% of Marion County students experienced physical neglect compared to 6.97% of Ohio students.
- **Alcohol use –**
  - + 80.08% of Marion County students have not had a drink of alcohol other than a few sips compared to 73.35% of Ohio students. 6.01% of students had their first drink of alcohol at ages 13-14 compared to 8.02%.
  - + 96.42% of Marion County students drank one or more drinks of an alcoholic beverage compared to 91.05% of Ohio students. 3.58% of students drank one or more drinks of an alcoholic beverage compared to 8.95% in Ohio.
  - + 62.50% of Marion County students drank alcohol 1-2 days compared to 66.59% of Ohio students.

- + 72.73% of Marion County students did not have drinks within 2 hours compared to 56.03% in Ohio.
- + 15.15% of Marion County students and 27.90% of Ohio students reported that in the past 30 days, they had more than the recommended drinks of alcohol within 2 hours.
- + 50% of Marion County students reported that someone gave alcohol to them compared to 40.78% of Ohio students.

- **Cigarettes**

- + In the past 30 days, 1.58% of school-aged children from Marion County smoked part or all of a cigarette compared to 2.34% in Ohio. 98.42% of Marion County students did not smoke cigarettes compared to 97.66% in Ohio. Less than 1% of the students who smoked cigarettes used cigarettes, cigars, cigarillos, or little cigars for 1-2 days in the past 30 days.
- + Similarly, less than 1% of students who smoked used chewing tobacco, snuff, or dip, snus or dissolvable tobacco products, such as Copenhagen, Grizzly, Skoal, or Camel Snus.

- **Misuse of Prescription Drugs (OxyContin, Percocet, Vicodin, codeine, Adderall, Ritalin, or Xanax)**

- + 93.45% of Marion County students and 93.56% of Ohio students did not use prescription drugs without a doctor's prescription or differently from why it was prescribed for.
- + Among the Marion County students, 4.44% used prescription drugs either without a doctor's prescription or differently for 1-2 times compared to 3.46% in Ohio. Majority of the students who misused prescription drugs before school, after school, weeknights, and weekends.

**Table 51. Summary of self-reported data on lifetime exposure to Adverse Childhood Experiences (ACEs) of school children who responded to OHYES! survey in 2022-2023. ACEs were categorized as abuse, household challenges and neglect (Ohio Department of Mental Health and Addiction Services, Ohio Department of Health, Ohio Department of Education and Workforce, 2023).**

	Marion County Percent (2022-2023)	OH YES! Percent (2022-2023)
<b>Abuse</b>		
Physical Abuse	17.69%	19.63%
Emotional Abuse	58.73%	61.05%
Sexual Abuse	4.50%	5.25%

**Appendix Table 66. Summary of self-reported data on taking prescription drugs without a doctor's prescription or differently than how the medicine was prescribed among Marion County school-aged children who participated in OHYES! 2022-2023. The students were asked the question; "Among those who have taken a prescription drug without a doctor's prescription; When do you usually use prescription drugs not prescribed to you?" (Ohio Department of Mental Health and Addiction Services, Ohio Department of Health, Ohio Department of Education and Workforce, 2023).**

Student Responses	Marion County Percent (2022-2023)	Ohio Statewide OHYES! Percent (2022-2023)
<b>Survey Question:</b>  "Among those who have taken a prescription drug without a doctor's prescription; When do you usually use prescription drugs not prescribed to you?"		
Before school	45.45%	41.24%
During school	9.09%	11.70%
After school	40.91%	48.73%
Weeknights	31.82%	36.15%
Weekends	36.36%	49.92%

**Appendix Table 67. Summary of self-reported data on taking over-the-counter medications to “get high” among Marion County school-aged children who participated in OHYES! 2022-2023. The students were asked the question; “During your life, how many times have you taken over-the-counter medications such as cold medicine, allergy medicine, or pain reliever to get high?” (Ohio Department of Mental Health and Addiction Services, Ohio Department of Health, Ohio Department of Education and Workforce, 2023).**

<b>Student Responses</b>	<b>Marion County Percent (2022-2023)</b>	<b>Ohio Statewide OHYES! Percent (2022-2023)</b>
“During your life, how many times have you taken over-the-counter medications such as cold medicine, allergy medicine, or pain reliever to get high?”		
0 time	92.45%	92.03%
1 or 2 times	1.91%	2.28%
3 to 9 times	1.60%	1.56%
10 to 19 times	0.85%	1.15%
20 to 39 times	1.06%	0.81%
40 or more times	2.13%	2.17%

**Appendix Table 68. Summary of self-reported data on first time marijuana use among Marion County school-aged children who participated in OHYES! 2022-2023. The students were asked the question; “How old were you when you tried marijuana for the first time?” (Ohio Department of Mental Health and Addiction Services, Ohio Department of Health, Ohio Department of Education and Workforce, 2023).**

Student Responses	Marion County Percent (2022-2023)	Ohio Statewide OHYES! Percent (2022-2023)
<b>Survey Question:</b> “How old were you when you tried marijuana for the first time?”		
I have never tried marijuana.	90.19%	87.14%
8 years old or younger	0.42%	0.46%
9 or 10 years old	1.27%	0.78%
11 or 12 years old	2.43%	2.44%
13 or 14 years old	4.11%	4.70%
15 or 16 years old	1.37%	3.95%
17 years old or older	0.21%	0.53%

**Appendix Table 69. Summary of self-reported data on first time marijuana use among Marion County school-aged children who participated in OHYES! 2022-2023. The students were asked the question; “During the past 30 days, have you used marijuana or hashish?” (Ohio Department of Mental Health and Addiction Services, Ohio Department of Health, Ohio Department of Education and Workforce, 2023).**

Student Responses	Marion County Percent (2022-2023)	Ohio Statewide OHYES! Percent (2022-2023)
<b>Survey Question:</b> “During the past 30 days, have you used marijuana or hashish?”		
I have never tried marijuana.	90.29%	87.17%
“During the past 30 days, have you used marijuana or hashish?”		
No	5.70%	7.11%
Yes	4.01%	5.72%

**Appendix Table 70. Summary of self-reported data on first time marijuana use among Marion County school-aged children who participated in OHYES! 2022-2023. The students were asked the question; “Among those who have used marijuana in the past 30 days; how many times did you use marijuana?” (Ohio Department of Mental Health and Addiction Services, Ohio Department of Health, Ohio Department of Education and Workforce, 2023).**

Student Responses	Marion County Percent (2022-2023)	Ohio Statewide OHYES! Percent (2022-2023)
<b>Survey Question:</b>  “Among those who have used marijuana in the past 30 days; how many times did you use marijuana?”		
1 or 2 times	42.86%	28.68%
3 to 9 times	20%	24.53%
10 to 19 times	8.57%	13.29%
20 to 39 times	11.43%	10.48%
40 or more times	17.14%	23.02%

**Appendix Table 71. Summary of self-reported data on usual method of using marijuana among Marion County school-aged children who participated in OHYES! 2022-2023. The students were asked the question; “During the past 30 days, how did you usually use marijuana?” (Ohio Department of Mental Health and Addiction Services, Ohio Department of Health, Ohio Department of Education and Workforce, 2023).**

Student Responses	Marion County Percent (2022-2023)	Ohio Statewide OHYES! Percent (2022-2023)
<b>Survey Question:</b>  “During the past 30 days, how did you usually use marijuana?”		
I smoked it in a joint, bong, pipe, or blunt.	62.16%	56.54%
I ate it in food such as brownies, cakes, cookies, or candy.	10.81%	6.91%
I drank it in tea, cola, alcohol, or other drinks	0%	0.31%
I vaporized it.	18.92%	27.44%
I dabbed it using waxes or concentrates.	0%	4.77%
I used it some other way.	8.11%	4.03%

**Appendix Table 72. Summary of self-reported data on when marijuana is commonly used by Marion County school-aged children who participated in OHYES! 2022-2023. The students were asked the question; “Among those who have used marijuana in the past 30 days; When do you usually use marijuana?” (Ohio Department of Mental Health and Addiction Services, Ohio Department of Health, Ohio Department of Education and Workforce, 2023).**

<b>Student Responses</b>	<b>Marion County Percent (2022-2023)</b>	<b>Ohio Statewide OHYES! Percent (2022-2023)</b>

Before school	34.21%	33.08%
During school	13.16%	22.28%
After school	52.63%	55.80%
Weeknights	44.74%	54.46%
Weekends	78.95%	85.36%

**MHA – 6. Continue to support Marion Public Health’s “Clean Needle Exchange Program”** – Continue to sponsor, collaborate, and promote awareness of Marion Public Health’s “Clean Needle Exchange Program”, which aims to serve persons with addiction to heroin or other intravenous drugs as a way of mitigating the transmission of blood-borne pathogens such as (but not limited to) hepatitis C and human immunodeficiency virus (HIV). As part of the “Clean Needle Exchange Program”, Marion Public Health partners with various community stakeholders such as (but not limited to) Crawford-Marion Alcohol, Drug Addiction and Mental Health Board (Crawford-ADAMH Board), and Marion Area Counseling Center (MACC).

This action (**MHA – 6**) aligns with Ohio’s 2020-2022 State Health Improvement Plan (SHIP).

## OhioHealth Marion General Hospital’s Impact Related to MHA – 6 (Continue to support Marion Public Health’s “Clean Needle Exchange Program”).

OhioHealth Marion General Hospital’s multidisciplinary team has continued to educate patients and families about the Harm Reduction efforts in Marion County and statewide. Harm reduction efforts help people with substance use disorders with tools and education so they could make positive changes in their lives and empower them to save themselves.

Marion Public Health collaborates with Harm Reduction in Ohio, Crawford-Marion Alcohol, Drug and Addiction Mental Health Board, and various mental and behavioral health agencies serving Marion County in two harm reduction efforts: (a) naloxone distribution; and (b) Safe Syringe program (Marion Public Health, 2024).

- **Naloxone (Narcan) kits distribution and training free of charge** – Naloxone kits are available for pick-up at the Marion Public Health office, which is located at 181 S. Main Street, Marion, Ohio 43302, 8 AM to 4:30 PM Monday to Friday. Marion Public Health team trains workplaces and businesses to teach about recognition of signs and symptoms of drug overdose and use of naloxone for emergency use.
- **Needle and Syringe Exchange Service** – allows program participants receive sterile syringes, education, linkage, and referral to community-based services that enables access to care. The Marion Public Health’s Needle and Syringe Exchange Service is available to serve people on Tuesdays, 9 AM to 3:30 PM and Fridays, 1 PM to 3:30 PM at the Marion Public Health office that is located at 181 S. Main Street, Marion, Ohio 43302.

**Appendix Tables 45 and 46** shows suicide and overdose deaths trend data, respectively, for Marion County, Ohio, and United States.

Marion Public Health’s Clean Needle Exchange program prevents the spread of infectious diseases such as viral hepatitis, human immunodeficiency virus and other diseases such as skin infections, skin abscesses, and endocarditis (Centers for Disease Control and Prevention, 2024).

## OhioHealth Marion General Hospital’s Alignment with Ohio’s State Health Improvement Plan related to MHA – 6 (Continue to support Marion Public Health’s “Clean Needle Exchange Program).

**Appendix Table 73** summarizes publicly available data on various measures related to mental health and addiction for Marion County, Ohio, and United States. Findings from **Appendix Table 73** show that Marion County residents experienced higher levels of physical and mental distress and higher drug overdose death rates compared to Ohio and United States.

**Appendix Table 73. Summary of OhioHealth Marion General Hospital alignment with Ohio's 2020-2022 State Health Improvement Plan (SHIP) that shows mental health and addiction data for Marion County versus Ohio, and United States (County Health Rankings, 2024).**

Measure	Dates	Marion County	Ohio	United States
<b>Premature Death</b>  Years of potential life lost before age 75, per 100,000 people (age-adjusted)	2019-2021	11,000 years of life lost before age 75, per 100,000 people	9,400 years of life lost before age 75, per 100,000 people	8,000 years of life lost before age 75, per 100,000 people
<b>Premature Death</b>  Disaggregation by Racialized Group	2019-2021	<b>All:</b> 11,000  <b>Non-Hispanic Black:</b> 9,800  <b>Non-Hispanic White:</b> 11,500	No data	No data
<b>Premature Age-Adjusted Mortality</b>  Number of deaths among residents under age 75 per 100,000 population (age-adjusted)	2019-2021	540 deaths under age 75 per 100,000 people	450 deaths under age 75 per 100,000 people	390 deaths under age 75 per 100,000 people
<b>Premature Age-Adjusted Mortality</b>  Disaggregation by Racialized Group		<b>All:</b> 540  <b>Non-Hispanic Black:</b> 550  <b>Non-Hispanic White:</b> 550	No data	No data
<b>Poor Physical Health Days</b>  Average number of physically unhealthy days reported in past 30 days (age-adjusted)	2021	4.1 physically unhealthy days	3.6 physically unhealthy days	3.3 physically unhealthy days

**Continuation of Appendix Table 73. Summary of OhioHealth Marion General Hospital alignment with Ohio's 2020-2022 State Health Improvement Plan (SHIP) that shows mental health and addiction data for Marion County versus Ohio, and United States. Data on yearly trends and demographic breakdown are provided for Marion County whenever available (County Health Rankings, 2024).**

Measure	Dates	Marion County	Ohio	United States
<b>Poor Mental Health Days</b>  Average number of mentally unhealthy days reported in past 30 days (age-adjusted)	2021	6.1 mentally unhealthy days	5.5 mentally unhealthy days	4.8 mentally unhealthy days
<b>Child Mortality Rate</b>  Number of deaths among residents under age 20 per 100,000 people	2018-2021	50 deaths under age 20 per 100,000 people	60 deaths under age 20 per 100,000 people	50 deaths under age 20 per 100,000 people
<b>Alcohol-Impaired Driving Deaths</b>  Percent of driving deaths with alcohol involvement.	2017-2021	25%	32%	26%
<b>Alcohol-Impaired Driving Deaths</b>  Yearly Trends	2017-2021	<b>2017:</b> 17%  <b>2018:</b> 23%  <b>2019:</b> 88%  <b>2020:</b> 0%  <b>2021:</b> 10%	<b>2017:</b> 31%  <b>2018:</b> 31%  <b>2019:</b> 33%  <b>2020:</b> 34%  <b>2021:</b> 32%	<b>2017:</b> 26%  <b>2018:</b> 25%  <b>2019:</b> 26%  <b>2020:</b> 26%  <b>2021:</b> 26%%
<b>Drug Overdose Deaths</b>  Number of drug poisoning deaths per 100,000 people	2019-2021	53 drug poisoning deaths per 100,000 people	42 drug poisoning deaths per 100,000 people	27 drug poisoning deaths per 100,000 people

## 2022 Marion County Priority Health Need 2: Chronic Disease (CD).

**CD – 1. Continue to offer the OhioHealth Inpatient and Outpatient Diabetes Education Program** — Continue to offer inpatient and outpatient diabetes education at OhioHealth Marion General Hospital using concepts from the OhioHealth book “Solutions for Living Better with Diabetes. Managing your Diabetes One Step at a Time” (OhioHealth, 2019). OhioHealth diabetes educators will discuss the following:

- CD – 1.1.** Understanding diabetes
- CD – 1.2.** Blood glucose monitoring/testing
- CD – 1.3.** Medications
- CD – 1.4.** Nutrition
- CD – 1.5.** Exercise
- CD – 1.6.** Long-term complications
- CD – 1.7.** Reducing long-term complications
- CD – 1.8.** Resources (within OhioHealth and in the community)

### OhioHealth Marion General Hospital’s Impacts in Fiscal Year 2023-2024 related to CD – 1 (Continue to offer the OhioHealth Inpatient and Outpatient Diabetes Education Program).

OhioHealth’s personalized diabetes treatment programs can help you achieve your best level of health and maintain an active lifestyle. The OhioHealth Diabetes Care team provide the most current information and resources for self-management of Type 1, Type 2 and gestational diabetes. Patients, families, and their caregivers are educated about diabetes and development of diabetes self-management skills in individual or group sessions.

The multidisciplinary diabetes care team include but not limited to:

- Certified diabetes educators.
- Nurses.
- Dietitians.
- Exercise physiologists.
- Pharmacists.

The OhioHealth Diabetes Care program include activities such as but not limited to:

- Comprehensive education class series that includes individual assessments with a nurse educator and dietitian.
- Individual consultation with a nurse educator and/or dietitian for specific needs.
- Free support group meetings every other month.

Examples of diabetes care-related topics discussed with a nurse and/or dietitian include:

- Why do you need to manage diabetes?
- How do you safely manage diabetes?
- How do you prevent complications of diabetes?
- How do you use a glucose meter and take medications?
- How do you understand and deal with the emotional aspects of diabetes?
- How do you make behavior changes that promote a healthy lifestyle?
- Why do you need to manage diabetes?
- How do you safely manage diabetes?
- How do you prevent complications of diabetes?
- How do you use a glucose meter and take medications?
- How do you understand and deal with the emotional aspects of diabetes?
- How do you make behavior changes that promote a healthy lifestyle?

**Appendix Table 74 and 75** show the top 20 primary diagnoses of patients served in Fiscal Years 2023 and 2024, respectively, by the OhioHealth Physician Group (OPG) Endocrinology. This Clinic is located at 1050 Delaware Avenue, Marion, Ohio 43302.

**Appendix Table 74. Summary of top primary diagnoses among patients served in Fiscal Year 2023 (7/1/2022 to 6/30/2023) by the OhioHealth Physician Group Endocrinology, which is located at 1050 Delaware Avenue, Marion, Ohio 43302.**

Primary Diagnoses	Count of Patient Visits	Percent of Patients Served in Fiscal Year 2023 (N=4,290 visits)
Long term (current) use of insulin ( ICD-10-CM: Z79.4 )	1294 visits	30.20%
Type 2 diabetes mellitus with hyperglycemia ( ICD-10-CM: E11.65 )	533 visits	12.40%
Age-related osteoporosis without current pathological fracture ( ICD-10-CM: M81.0 )	469 visits	10.90%
Type 2 diabetes mellitus with diabetic chronic kidney disease ( ICD-10-CM: E11.22 )	396 visits	9.20%
Proteinuria, unspecified ( ICD-10-CM: R80.9 )	282 visits	6.60%
Type 2 diabetes mellitus with other diabetic kidney complication ( ICD-10-CM: E11.29 )	263 visits	6.10%
Type 2 diabetes mellitus without complications ( ICD-10-CM: E11.9 )	258 visits	6%
Postprocedural hypothyroidism ( ICD-10-CM: E89.0 )	248 visits	5.80%
Hypothyroidism, unspecified ( ICD-10-CM: E03.9 )	242 visits	5.60%
Thyrotoxicosis, unspecified without thyrotoxic crisis or storm ( ICD-10-CM: E05.90 )	242 visits	5.60%
Nontoxic multinodular goiter ( ICD-10-CM: E04.2 )	204 visits	4.80%
Chronic kidney disease, stage 3b ( ICD-10-CM: N18.32 )	131 visits	3.10%
Nontoxic single thyroid nodule ( ICD-10-CM: E04.1 )	120 visits	2.80%
Chronic kidney disease, stage 3a ( ICD-10-CM: N18.31 )	115 visits	2.70%
Autoimmune thyroiditis ( ICD-10-CM: E06.3 )	113 visits	2.60%

**Continuation of Appendix Table 74. Summary of top primary diagnoses among patients served in Fiscal Year 2023 (7/1/2022 to 6/30/2023) by the OhioHealth Physician Group Endocrinology, which is located at 1050 Delaware Avenue, Marion, Ohio 43302.**

<b>Primary Diagnoses</b>	<b>Count of Patient Visits</b>	<b>Percent of Patients Served in Fiscal Year 2023 (N=4,290 visits)</b>
Type 1 diabetes mellitus with hyperglycemia ( ICD-10-CM: E10.65 )	97 visits	2.30%
Type 2 diabetes mellitus with diabetic polyneuropathy ( ICD-10-CM: E11.42 )	91 visits	2.10%
Hyperparathyroidism, unspecified ( ICD-10-CM: E21.3 )	90 visits	2.10%
Other specified disorders of bone density and structure, unspecified site ( ICD-10-CM: M85.80 )	79 visits	1.80%
Chronic kidney disease, stage 4 (severe) ( ICD-10-CM: N18.4 )	74 visits	1.70%

**Appendix Table 75. Summary of top primary diagnoses among patients served in Fiscal Year 2024 (7/1/2023 to 6/30/2024) by the OhioHealth Physician Group Endocrinology, which is located at 1050 Delaware Avenue, Marion, Ohio 43302.**

Primary Diagnoses	Count of Patient Visits	Percent of Patients Served in Fiscal Year 2024 (N=4,148 visits)
Long term (current) use of insulin ( ICD-10-CM: Z79.4 )	1312 visits	31.60%
Type 2 diabetes mellitus with hyperglycemia ( ICD-10-CM: E11.65 )	585 visits	14.10%
Age-related osteoporosis without current pathological fracture ( ICD-10-CM: M81.0 )	443 visits	10.70%
Type 2 diabetes mellitus with diabetic chronic kidney disease ( ICD-10-CM: E11.22 )	386 visits	9.30%
Proteinuria, unspecified ( ICD-10-CM: R80.9 )	314 visits	7.60%
Type 2 diabetes mellitus without complications ( ICD-10-CM: E11.9 )	298 visits	7.20%
Type 2 diabetes mellitus with other diabetic kidney complication ( ICD-10-CM: E11.29 )	290 visits	7%
Postprocedural hypothyroidism ( ICD-10-CM: E89.0 )	237 visits	5.70%
Hypothyroidism, unspecified ( ICD-10-CM: E03.9 )	229 visits	5.50%
Nontoxic multinodular goiter ( ICD-10-CM: E04.2 )	184 visits	4.40%
Thyrotoxicosis, unspecified without thyrotoxic crisis or storm ( ICD-10-CM: E05.90 )	168 visits	4.10%
Chronic kidney disease, stage 3a ( ICD-10-CM: N18.31 )	128 visits	3.10%
Autoimmune thyroiditis ( ICD-10-CM: E06.3 )	121 visits	2.90%
Chronic kidney disease, stage 3b ( ICD-10-CM: N18.32 )	116 visits	2.80%
Nontoxic single thyroid nodule ( ICD-10-CM: E04.1 )	104 visits	2.50%

**Continuation of Appendix Table 75. Summary of top primary diagnoses among patients served in Fiscal Year 2024 (7/1/2023 to 6/30/2024) by the OhioHealth Physician Group Endocrinology, which is located at 1050 Delaware Avenue, Marion, Ohio 43302.**

**CD – 4. Continue partnership with the Marion County’s “Creating Healthy Communities”** — Continue to partner with Creating Healthy Communities in Marion County, which has a mission “to bring about policy system and environmental changes in the community that create opportunities for everyone to be as healthy as they can be” (Marion Public Health, 2021).

**CD – 4.1.** Focus on healthy eating, including (a) Healthy Food Guidelines; (b) Healthy Food Retail; and (c) Fruit and Vegetable Prescription program to increase access to healthy foods among north-end residents of Marion County.

**CD – 4.2.** Focus on active living, including (a) neighborhood parks and playground; (b) creation of active transportation plan; and (c) improvement in walking and biking infrastructure.

**CD – 4.3.** Focus on community and coalition development, including (a) engagement of community partners and residents; (b) health equity; and (c) fostering inclusive community.

This action (**CD – 4**) aligns with Ohio’s 2020-2022 State Health Improvement Plan. OhioHealth Marion General Hospital will collaborate with Marion Public Health in various initiatives related to healthy eating, active living and community and coalition development.

### OhioHealth Marion General Hospital Impacts related to CD 4 (Continue partnership with the Marion County’s “Creating Healthy Communities”).

OhioHealth Marion General Hospital is an active member of the Marion County Creating Healthy Communities Coalition. **Appendix Table 84** lists the examples of partners of the Marion County Creating Healthy Communities who are involved in various Coalition initiatives.

**Appendix Table 84. Examples of community organizations and local resident partners of the Marion County Creating Healthy Communities Coalition (Marion Public Health, 2024).**

• Boys and Girls Club	• Marion City Police	• Marion Visitors Bureau
• Buckeye Community Schools	• Marion City Schools	• OhioHealth Marion General Hospital
• Caledonia Farmer's Market	• Marion County Board of Developmental Disabilities	• Pleasant Local Schools
• Center Street Community Clinic	• Marion County Commissioners	• Ridgedale Local Schools
• Christ Missionary Baptist Church	• Marion County Council on Aging	• River Valley Local Schools
• City of Marion	• Marion County Job and Family Services	• The Ohio State University Extension
• Downtown Marion, Inc.	• Marion County Park District	• The Ohio State University Marion
• Elgin Local Schools	• Marion Family YMCA	• Tri-Rivers Career Center
• Local residents	• Marion Matters	• United Way of Marion County
• Logos Christian Ministries	• Marion Regional Planning	• Village of New Bloomington
• Marion Area Chamber of Commerce	• Marion Senior Center	• Village of Prospect
• Marion City Council	• Marion Technical College	• Whirlpool
• Marion City Parks	• Marion Township Trustees	

The mission of the Marion County Creating Healthy Communities Coalition is “Activating community-led solutions to create sustainable change in policies, places, and population health.” The Coalition’s vision is “Vibrant Ohio communities where everyone has access to healthy food and opportunities for active living.” The Coalition’s Health Equity Statement is “Health equity is achieved when all people in a community have access to affordable, inclusive, and quality infrastructure and services that, despite historical and contemporary injustices, allows them to reach their full health potential.” (Marion Public Health, 2024).

The principles of “Creating Healthy Communities” include:

- **Sustainable and equitable investments** – investment in policies, projects, places, and people to create and sustain equity in access to eating healthy and living actively.
- **Self-Awareness and empathy** – strengthen self-awareness and empathy among Coalition participants
- **Community-Led Solutions** – The Coalition enables marginalized members of society to manifest their collective power to develop solutions to community problems.
- **Organizational Partnership** – The Coalition partners with various organizations to achieve vision and priorities.
- **Coordinator responsibility** – The Coordinators are humble, transparent, dependable, and respectful when performing their functions and responsibilities.

Marion Public Health provided leadership and coordination related to the implementation of the Center Street Downtown Market. The Market is 0.3 miles from the Women; Infants and Children (WIC) office and 0.1 mile from the transit hub. The center Street Market was designated as a WIC vendor. The Marion Public Health collaborated with WIC and the Center Street Market in ensuring the availability and social marketing of nutritious foods, administration of WIC benefits in downtown Marion (Marion Public Health, n.d.).

Marion County’s Food Action Plan was developed to prevent food insecurity and improve equitable food access in Marion County. The Food Action Plan’s objectives are listed in **Appendix Table 85**.

## OhioHealth Marion General Hospital’s Alignment with the 2020-2022 State Health Improvement Plan related CD – 4 (Continue partnership with the Marion County’s “Creating Healthy Communities”).

**Appendix Table 86** shows the summary of measures pertaining to health outcomes and health factors that may be related to programs and services to promote healthy eating and active living and physical activity.

**Appendix Table 85. Summary of Marion County strategies, objectives, and desired outcomes described in the Marion County Food Access Policy and Planning Action Plan (Marion Public Health, 2024).**

Strategy	Objectives	Desired Outcome
Data Collection and Dissemination	<ul style="list-style-type: none"> <li>To achieve consistency across partner organizations in tracking eating of healthy foods.</li> <li>To assess barriers in preparing food.</li> <li>Create list of foods that are available in food pantries in Marion County.</li> <li>Create a data hub that provides the information to community members.</li> </ul>	A hub that provides information about foods and access to foods in Marion County.
Promote awareness related to food pantries, community meals and other food resources in Marion County	<ul style="list-style-type: none"> <li>Gather data on food insecurity needs in Marion County and organizations and agencies that provide access to healthy and nutritious foods.</li> <li>Develop a list of food pantries in Marion County.</li> <li>List of offerings that promote food access such as teaching kitchens, home deliveries, community meals, and Mid-Ohio Food Bank.</li> <li>List of Farmer's Markets in Marion County.</li> <li>Promote community engagement and awareness about food resources.</li> <li>Improve coordination and communication among community resources and agencies that address food access and insecurity.</li> </ul>	Accessible map of locations of local food pantries, community meals, and other food resources.

**Continuation of Appendix Table 85. Summary of Marion County strategies, objectives, and desired outcomes described in the Marion County Food Access Policy and Planning Action Plan (Marion Public Health, 2024).**

Strategy	Objectives	Desired Outcome
Provide access to Marion County community teaching kitchens.	<ul style="list-style-type: none"> <li>Summarize findings about needs related to food education and barriers to preparing foods.</li> <li>Identify the teaching kitchens that will be operational to serve Marion County residents.</li> <li>Promote Marion County community participation in teaching kitchens.</li> <li>To host events that promote utilization of teaching kitchens.</li> <li>Continue evaluating and improving the process and outcomes of the teaching kitchens.</li> </ul>	Education about healthy foods access and preparations
To initiate micro farming (small gardens) in Marion County.	<ul style="list-style-type: none"> <li>Determine gaps and needs of micro farms in Harding and River Valley.</li> <li>Enhance recruitment of farmers.</li> <li>Solicitation of produce throughout Marion.</li> <li>Host events with micro farms.</li> <li>Identify appropriate public service education.</li> </ul>	Support to existing and new micro farms in Marion County.

**MICH – 2. Continue Partnerships with Marion Public Health’s Women, Infants and Children (WIC) and Nursing Division** — Continue to partner with Marion Public Health’s division of Women, Infants and Children and Nursing and other community social service agencies to reduce teen pregnancies and birth rates by providing non-judgmental education, counseling, and support to adolescent girls and boys priority ages 13-19 to promote awareness on safe sex practices, family planning and personal responsibility. Examples of programs (but not limited to):

**MICH – 2.1.** Immunizations

**MICH – 2.2.** Women, Infants and Children

**MICH – 2.3.** Children with Medical Handicaps Program

**MICH – 2.4.** Lead screening

**MICH – 2.5.** Breastfeeding education

**MICH – 2.6.** First 1,000 Days Coalition for infants to thrive

**MICH – 2.7.** Baby and Me Tobacco Free

**MICH – 2.8.** Baby boxes

This action (**MICH – 2**) aligns with Ohio’s 2020-2022 State Health Improvement Plan. See Table 7 for more details about the alignment.

## OhioHealth Marion General Hospital’s Impacts related to MICH 2 (Continue Partnerships with Marion Public Health’s Women, Infants and Children (WIC) and Nursing Division).

OhioHealth Marion General Hospital has given all postpartum patients with information about Women, Infants and Children (WIC). OhioHealth educates its patients about WIC’s goal of protecting the health of low-income, nutritionally at-risk pregnant and postpartum women and children less than age 5. Caulfield et al., (2022) has shown that WIC participation during prenatal care led to the following outcomes:

- Low risk of preterm delivery
- Low risk of infant mortality
- Lowered risk of poor weight gain at pregnancy
- Increased child preventive care
- Higher cognitive scores in children
- Greater intake of 100% fruit juice
- Greater intake of age-appropriate milk
- Low risk of low birth weight
- Improved diet of the mother
- Low risk for alcohol use
- Increased child immunizations
- Better diet quality
- Greater intake of whole grain cereals

**Appendix Table 91** show number of women had high-risk pregnancies and were referred to the OhioHealth Maternal and Fetal Medicine.

**Appendix Tables 92 to 94** summarizes data on birth outcomes of women who delivered at the OhioHealth Marion General Hospital.

**Appendix Table 91. Summary of Marion County patients with high-risk pregnancies who were referred in Fiscal Years 2023 (7/1/2022 to 6/30/2023) and 2024 (7/1/2023 to 6/30/2024) to the OhioHealth Physician Group (OPG) Maternal-Fetal Medicine. The Clinic is located at 1000 McKinley Park Drive, Marion, Ohio 43302.**

	<b>Fiscal Year 2023 Count of Patients Referred to OPG Maternal-Fetal Medicine</b>	<b>Fiscal Year 2024 Count of Patients Referred to OPG Maternal-Fetal Medicine</b>
Patients with high-risk pregnancies who were referred to OPG Maternal-Fetal Medicine	0 patient	3 patients

**Appendix Table 92. Summary of birth outcomes of deliveries at the OhioHealth Marion General Hospital in Fiscal Years 2023 (7/1/2022 to 6/30/2023) and 2024 (7/1/2023 to 6/30/2024).**

<b>Birth Outcomes</b>	<b>Definition</b>	<b>Fiscal Year 2023 Deliveries</b>	<b>Fiscal Year 2024 Deliveries</b>
Count of babies born alive	Babies born alive	746 babies	738 babies
Percent low birth weight (less than 5 pounds 8 ounces)	Baby weighed less than 5 pounds 8 ounces at delivery.	5%	6.2%
Percent preterm birth (less than 37 weeks gestation)	Baby's gestational age was less than 37 weeks at delivery.	9.1%	7.7%

**Appendix Table 93. Delivery Methods of Mothers who Gave Birth at the OhioHealth Marion General Hospital in Fiscal Year 2023 (7/1/2022 to 6/30/2023).**

<b>Delivery Method</b>	<b>Count of Deliveries in Fiscal Year 2023</b>	<b>Percent of Deliveries in Fiscal Year 2023 (N=746 Births)</b>
Vaginal, Spontaneous	489 births	65.50%
Cesarian-Section, Low Transverse	215 births	28.80%
Vaginal, Precipitous	26 births	3.50%
Vaginal, Vacuum (Extractor)	8 births	1.10%
Cesarian-Section, Low Vertical	5 births	0.67%
Cesarian-Section, Classical	2 births	0.27%
Vaginal, Breech	1 birth	0.13%

**Appendix Table 94. Delivery Methods of Mothers who Gave Birth at the OhioHealth Marion General Hospital in Fiscal Year 2024 (7/1/2023 to 6/30/2024).**

<b>Delivery Method</b>	<b>Count of Deliveries in Fiscal Year 2024</b>	<b>Percent of Deliveries in Fiscal Year 2024 (N=738 live births)</b>
Vaginal, Spontaneous	480 births	65%
Cesarian-Section, Low Transverse	215 births	29.10%
Vaginal, Vacuum (Extractor)	21 births	2.80%
Vaginal, Precipitous	20 births	2.70%
Cesarian-Section, Classical	1 birth	0.14%
Cesarian-Section, T-Shaped	1 birth	0.14%

**OhioHealth Marion General Hospital's Alignment with the State Health Improvement Plan related to MICH – 2 (Continue Partnerships with Marion Public Health's Women, Infants and Children (WIC) and Nursing Division). Data were obtained from County Health Rankings (2024).**

**Appendix Table 95** shows various measures that demonstrate Marion County's success related to reducing percent of low birthweight, child mortality, Human Immunodeficiency Virus (HIV), and sexually transmitted infections in Marion County. The outcomes for Marion County are compared to Ohio, and United States.

**Appendix Table 95. Summary of measures related to maternal, infant and child health (MICH) in Marion County, compared to Ohio, and United States. Data were obtained from County Health Rankings (2024).**

Measure	Years	Marion County	Ohio	United States
<b>Low Birthweight</b>  Percentage of live births with low birthweight (< 2,500 grams).	2016-2022	8%	9%	8%
<b>Low Birthweight</b>  Disaggregation by racialized group	2016-2022	<b>All:</b> 8%  <b>Hispanic (All races):</b> 10%  <b>Non-Hispanic Black:</b> 15%  <b>Non-Hispanic two or more races:</b> 19%  <b>Non-Hispanic White:</b> 8%	No data	No data
<b>Child Mortality</b>  Number of deaths among residents under age 20 per 100,000 population.	2018-2021	50 deaths under age 20 per 100,000 people	60 deaths under age 20 per 100,000 people	50 deaths under age 20 per 100,000 people
<b>Infant Mortality</b>  Number of infant deaths (within 1 year) per 1,000 live births.	2015-2021	7 infant deaths under age 1 per 1,000 live births	7 infant deaths under age 1 per 1,000 live births	6 infant deaths under age 1 per 1,000 live births

**Continuation of Appendix Table 95. Summary of measures related to maternal, infant and child health (MICH) in Marion County, compared to Ohio, and United States. Data were obtained from County Health Rankings (2024).**

Measure	Years	Marion County	Ohio	United States
<b>HIV (Human Immunodeficiency Virus) Prevalence</b>  Number of people aged 13 years and older living with a diagnosis of human immunodeficiency virus (HIV) infection per 100,000 population.	2021	201 persons age 13 and above with HIV	242 persons age 13 and above with HIV	382 persons age 13 and above with HIV
<b>Adult Obesity</b>  Percentage of the adult population (age 18 and older) that reports a body mass index (BMI) greater than or equal to 30 kg/m2 (age-adjusted).	2021	46% of adults had a BMI of 30 or greater	38% of adults had a BMI of 30 or greater	34% of adults had a BMI of 30 or greater
<b>Food Environment Index</b>  Index of factors that contribute to a healthy food environment, from 0 (worst) to 10 (best).	2019 and 2021	Food Environment Index of 6.6  (Better than average)	Food Environment Index of 7.0  (Better than average)	Food Environment Index of 7.7  (Better than average)
<b>Physical Inactivity</b>  Percentage of adults age 18 and over reporting no leisure-time physical activity (age-adjusted).	2021	31% of adults age 18 and over has no physical activity outside of work.	25% of adults age 18 and over has no physical activity outside of work.	23% of adults age 18 and over has no physical activity outside of work.
<b>Sexually Transmitted Infections</b>  Number of newly diagnosed chlamydia cases per 100,000 population.	2021	438 per 100,000 people	479 per 100,000 people	495.5 per 100,000 people

**Continuation of Appendix Table 95. Summary of measures related to maternal, infant and child health (MICH) in Marion County, compared to Ohio, and United States. Data were obtained from County Health Rankings (2024).**

<b>Child Care Cost Burden</b>  Child care costs for a household with two children as a percent of median household income.	2023 and 2022	26% of income of an average household was spent on child care.	29% of income of an average household was spent on child care.	27% of income of an average household was spent on child care.
<b>Child Care Centers</b>  Number of child care centers per 1,000 population under 5 years old.	2010-2022	7 child care centers per 1,000 children under age 5	8 child care centers per 1,000 children under age 5	7 child care centers per 1,000 children under age 5

## 2022 Priority Health Need 4: Access to Care

**AC – 1. Continue to provide access to the OhioHealth Physician Group and Clinically Integrated Network —** Foster partnerships and collaboration with the Marion County community and Marion Public Health to increase access to primary care physicians from the OhioHealth Physician Group and Clinically Integrated Network. Examples of primary care physicians include (but not limited to):

- AC – 1.1. Vivek R. Awasty, MD (internal medicine)** — affiliated with OhioHealth Physician Group located at 980 S. Prospect St., Suite 2, Marion, Ohio 43302
- AC – 1.2. Michael J. Hayes, MD (internal medicine)** — affiliated with OhioHealth Physician Group located at 980 S. Prospect St., Suite 1, Marion, Ohio 43302
- AC – 1.3. Michael G. McCleese, DO (internal medicine)** — affiliated with OhioHealth Physician Group located at 1040 Delaware Avenue, Marion, Ohio 43302
- AC – 1.4. Muhammad I. Khan, MD (internal medicine)** — affiliated with OhioHealth Physician Group located at 1130 Independence Avenue, Marion, Ohio 43302
- AC – 1.5. Sanjay K. Vora, MD (internal medicine)** — affiliated with OhioHealth Physician Group located at 1050 Delaware Avenue, Marion, Ohio 43302
- AC – 1.6. Cassandra L. Israel, MD (family medicine)** — affiliated with OhioHealth Physician Group located at 130 University Drive, Suite 1100, Marion, Ohio 43302
- AC – 1.7. Timothy B. Light, MD (family medicine)** — affiliated with OhioHealth Physician Group located at 130 University Drive Suite 1100, Marion, Ohio 43302
- AC – 1.8. Qihui J. Liu, MD (family medicine)** — affiliated with OhioHealth Physician Group located at 130 University Drive Suite 1100, Marion, Ohio 43302
- AC 1.9. Christopher G. Smallwood, MD** — affiliated with OhioHealth Physician Group located at 130 University Drive Suite 1100, Marion, Ohio 43302
- AC – 1.10. Sudesh S. Reddy, MD (internal medicine, pediatrics)** — affiliated with OhioHealth Clinically Integrated Network, Sudesh S. Reddy MD Inc located at 402 S. State St., Marion, Ohio 43302
- AC – 1.11. Ghulam Idrees, MD (internal medicine)** — affiliated with OhioHealth Clinically Integrated Network, Hardin Memorial Healthcare located at 1025 Hardin Memorial Parkway, Marion, Ohio 43302
- AC – 1.12. Melissa O. Mekesa, MD (family medicine)** — affiliated with OhioHealth Clinically Integrated Network, TeamHealth located at 1000 McKinley Park Drive, Marion Ohio 43302
- AC – 1.13. Parminder B. Singh, MD (internal medicine)** — affiliated with OhioHealth Clinically Integrated Network, Parminder B. Singh, MD, Inc., located at 970 S. Prospect St., Marion, Ohio 43302.
- AC – 1.14. Raymond J. Gardner, MD (family medicine)** — affiliated with OhioHealth Clinically Integrated Network, MIPA Family Care located at 1069 Delaware Avenue Suite 205A, Marion, Ohio 43302
- AC – 1.15. Khurshid N. Husain, MD** — affiliated with OhioHealth Clinically Integrated Network, Khurshid N. Husain, MD located at 1245 Forest Hill Drive, Marion, Ohio 43302

## OhioHealth Marion General Hospital impacts related to AC – 1 (Continue to provide access to the OhioHealth Physician Group and Clinically Integrated Network)

### Access to OhioHealth Outpatient and Ambulatory Clinics –

OhioHealth continues to provide top quality and equitable access to OhioHealth outpatient and ambulatory Clinics in Marion County. Data on diagnoses of patients served by primary care and pediatric clinics are presented in **Appendix Tables 96 to 113**.

**Appendix Tables 96 and 97** show the top diagnoses of patients served in Fiscal Years 2023 and 2024, respectively by the OhioHealth Physician Group (OPG) Primary Care Marion Medical Campus. The Primary Care Clinic is located at 1050 Delaware Avenue, Marion, Ohio 43302.

**Appendix Tables 98 and 99** show the top chronic disease diagnoses of patients served by the OhioHealth Physician Group (OPG) Primary Care Marion Medical Campus in Fiscal Year 2023 and 2024. The chronic disease diagnoses shown in Appendix Tables 98 and 99 include:

- Hypertension
- Obesity
- High cholesterol or high lipids
- Heart disease
- Coronary heart disease
- Asthma
- Diabetes
- Tobacco
- Chronic kidney disease (CKD)
- Stroke
- Cancer
- Chronic Obstructive Pulmonary Disease (COPD)
- Alzheimer's Disease

**Appendix Tables 100 and 101** show the top primary diagnoses among pediatric patients who had clinic visits in Fiscal Years 2023 and 2024, respectively, at the OhioHealth Physician Group (OPG) Pediatrics Marion. The OPG Pediatrics Clinic is located at 1040 Delaware Avenue, Marion, Ohio 43302.

**Appendix Tables 102 and 103** show the number and percent of pediatric patients seen at the OPG Pediatrics Marion who had diseases of the respiratory system. It is noteworthy that 43% and 41.5% of pediatric patients served in Fiscal Year 2023 and 2024, respectively, had acute upper respiratory infections. Moreover, 7.2% and 8.6% of pediatric patients served in Fiscal Year 2023 and 2024, respectively had influenza or pneumonia.

**Appendix Tables 104 and 105** show the number and percent of pediatric patients seen at the OPG Pediatrics Marion in Fiscal Years 2023 and 2024 who had diagnoses of certain infectious and parasitic diseases.

**Appendix Tables 106 and 107** show the top diagnoses of patients served in Fiscal Years 2023 and 2024, respectively, by the OhioHealth Physician Group (OPG) Primary Care Marion. The Primary Care Clinic is located at 1040 Delaware Avenue, Marion, Ohio 43302.

**Appendix Tables 108 and 109** show the top diagnoses of patients served in Fiscal Years 2023 and 2024, respectively, by the OhioHealth Physician Group (OPG) Primary Care Marion. The Primary Care Clinic is located at 1130 Independence Avenue, Marion, Ohio 43302.

**Appendix Tables 110 and 111** show the top diagnoses of patients served in Fiscal Years 2023 and 2024, respectively, by the OhioHealth Physician Group (OPG) Primary Care Marion University Drive. The Primary Care Clinic is located at 130 University Drive, Suite 1100, Marion, Ohio 43302.

**Appendix Tables 112 and 113** show the the top diagnoses of patients served in Fiscal Years 2023 and 2024, respectively, by the OhioHealth Physician Group (OPG) Primary Care Marion in S. Prospect Street. The Primary Care Clinic is located at 980 S. Prospect Street, Suite 1, Marion, Ohio 43302.

#### Access to OhioHealth Marion General Hospital Inpatient Facilities –

OhioHealth continues to provide top quality and equitable access to OhioHealth Marion General Hospital inpatient. Data on selected demographic profiles of patients served are provided in **Appendix Tables 114 to 127**. The Hospital is located at 1000 McKinley Park Drive, Marion, Ohio 433202.

**Appendix Tables 114 to 115** show the racial groups of patients admitted to the OhioHealth Marion General Hospital in Fiscal Years 2023 and 2024, respectively. It is noteworthy that Caucasians represented 94-95% of admissions and minorities comprised 5-6% of admissions. Patients from minority groups were comprised of African American or Black; other Asians, Asian Indian, Korean, Vietnamese, American Indian or Alaska Native, Native Hawaiian, Other Pacific Islander, Two or more Races; and Declined to Specify. It is noteworthy that Marion General Hospital has been serving increasingly diverse populations in recent years.

**Appendix Tables 116 to 117** show the ethnicity groups of patients admitted to the OhioHealth Marion General Hospital in Fiscal Years 2023 and 2024, respectively. Data show that Marion General Hospital has served approximately 4.0 to 4.5% Hispanics or Latino.

**Appendix Tables 118 to 119** show the various languages and dialects spoken by patient who were admitted at the OhioHealth Marion General Hospital in Fiscal Years 2023 and 2024, respectively. Examples of languages and dialects spoken include but not limited to: English; Spanish; American Sign Language (ASL); Creole-English; Arabic; Indian Punjabi; Indian Hindi; Indian Gujarati; Russian; Ga; Haitian-Creole; Armenian; Dutch; Efik; Italian; Pidgin; Portuguese; Serbian; Thai; and Vietnamese.

**Appendix Tables 120 to 121** show the breakdown of admissions based on patient class categories. In Fiscal Year 2023, 54.5% were inpatient admissions; 32.6% were observation; 6% were psychiatric inpatient admissions; 5.8% were newborn admissions; 0.96% were inpatient hospice admissions and 0.04% were outpatient in a bed admissions. In Fiscal Year 2024, 59.8% were inpatient admissions; 25.8% were observation; 7.3% were psychiatric inpatient admissions; 1.1% were inpatient hospice; 0.05% were outpatient admissions in a bed; and 0.02% were neonatal intensive care unit admissions.

**Appendix Tables 122 and 123** show the payer mix of patients admitted in OhioHealth Marion General Hospital in Fiscal Years 2023 and 2024, respectively. It is noteworthy that approximately half of the patients served had Medicare and one-fourth of the patients served had Medicaid insurance.

**Appendix Tables 124 and 125** show the residence zip codes of patients admitted in OhioHealth Marion General Hospital in Fiscal Years 2023 and 2024, respectively. Approximately 86% of the patient admissions were from Marion County.

**Appendix Tables 126 and 127** summarizes the principal problems of patients who were admitted in OhioHealth Marion General Hospital in Fiscal Years 2023 and 2024, respectively. The top reasons for hospitalizations were chest pain, sepsis, pain, heart attack, pregnancy, and sepsis.

### Access to OhioHealth Marion General Hospital Emergency Department –

The OhioHealth Marion General Hospital Emergency Department has provided top quality emergency services and equitable access to care for patients regardless of ability to pay. Data are shown in **Appendix Tables 128 to 137**.

**Appendix Tables 128 and 129** summarize the various racial groups served by the OhioHealth Marion General Hospital Emergency Department in Fiscal Years 2023 and 2024, respectively. Approximately 9-10% of patients served were minorities.

**Appendix Tables 130 and 131** summarize the various ethnicities served by the OhioHealth Marion General Hospital Emergency Department in Fiscal Years 2023 and 2024, respectively. Approximately 5-6% of patients served were Hispanic or Latino.

**Appendix Tables 132 and 133** summarize the languages and dialects spoken by patients served by the OhioHealth Marion General Hospital Emergency Department in Fiscal Years 2023 and 2024, respectively. Approximately 2% of patients served did not speak English. Examples of languages spoken include but not limited to: English; Spanish; American Sign Language (ASL); Turkish; Nepali; Arabic; Armenian; Creole-English; Efik; Greek; Haitian-Creole; Indian Punjabi; Thai; Burmese; Estonian; French; German; Haitian-Creole; Mandarin; Polish; and Urdu.

**Appendix Tables 134 and 135** summarize the patient financial class (payer) among patients served by the OhioHealth Marion General Hospital Emergency Department in Fiscal Years 2023 and 2024, respectively. The top three health insurance of patients served include Medicaid, Medicare and Private insurance, which comprised 90% of the Emergency Department encounters in Fiscal Years 2023 and 2024.

**Appendix Tables 136 and 137** summarize the residence zip codes of patients served by the OhioHealth Marion General Hospital Emergency Department in Fiscal Years 2023 and 2024, respectively. Marion County residents comprised 88% of the patients served by the Emergency Department in Fiscal Years 2023 and 2024.

**Appendix Table 96. Summary of top diagnoses of patients served in Fiscal Years 2023 (7/1/2022 to 6/30/2023) by the OhioHealth Physician Group (OPG) Primary Care Marion Medical Campus. This OPG Primary Care Clinic is located at 1050 Delaware Avenue, Marion, Ohio 43302.**

<b>Diagnoses</b>	<b>Count of Patients Served in Fiscal Year 2023</b>	<b>Percent of Patients Served in Fiscal Year 2023 (N=1,073 patients)</b>
Essential (primary) hypertension ( ICD-10-CM: I10 )	765 patients	71.30%

**AC – 2. Continue to provide access to transportation through partnerships with CMM Mobility Management**

— Continue to collaborate with Marion Public Health and CMM Mobility Management in promoting awareness of the services from Mobility Management serving Crawford, Marion and Morrow Counties, such as (but not limited to): (a) coordination of transit services, (b) eligibility /referrals for clients needing transportation assistance, (c) training for drivers; (d) training services during travel; (e) “Safe Routes to School”; (f) “Complete Streets” and “Active Transportation”; (g) roundtable discussion locally and regionally; and (h) community outreach. Additional information about Mobility Management is available in CMM Mobility (2019). In Marion County, examples of community agencies that assist persons with transportation needs include (but not limited to):

- AC – 2.1. Continue partnerships and cross-referrals with Marion Senior Center** — door-to-door transportation services for seniors in Marion County, age 60+, such as doctor appointments, shopping, trips to beauty and/or barber shops (City of Marion, Ohio, n.d.). The Marion Senior Center is a public service of the City of Marion, Ohio.
- AC – 2.2. Continue partnerships and cross-referrals with Marion Area Transit (MAT)** — provide curb-to-curb, based on demand, and a service bus (City of Marion, Ohio, n.d.). The Marion Area Transit is a public service of the City of Marion, Ohio.
- AC – 2.3. Continue partnerships with Marion City/County Regional Planning Commission** — leads the “Complete Streets” project that combines service, mobility, and safety that are inclusive for all persons (Marion City/County Regional Planning Commission, 2021).
- AC – 2.4. Continue partnerships and cross-referrals with Marion County Council on Aging** — contracts with Marion Senior Center and other county-wide transportation services for seniors who are living independently (Marion County Council on Aging, 2021).
- AC – 2.5. Continue partnerships and cross-referrals with Job and Family Services Marion County** — as part of the Ohio Medicaid benefits, persons have access to medical non-emergency transportation. Persons receiving Ohio Medicaid with transportation to and from Medicaid-covered appointments. Assistance include bus passes for the Marion Area Transit, fuel vouchers or access to Medicaid contracted vehicles (Marion County Job and Family Services (2003-2020)).

## OhioHealth Marion General Hospital's Impacts Related to AC – 2 (Continue to provide access to transportation through partnerships with CMM Mobility Management)

The OhioHealth Marion General Hospital's multidisciplinary team, especially the Care Management team has been giving information to patients, families and caregivers about various transportation services that are available to serve Marion County. OhioHealth Marion General Hospital's team is knowledgeable about the programs and services of the CMM Mobility Solutions Center (CMM Mobility, Ohio, 2022).

These include but not limited to:

- **Marion Senior Center** – located at 2375 Harding Highway East, Marion, Ohio 43302. The Senior Center is a facility where older adults meet to fulfill their social, physical, and emotional needs. The Senior Center is open Monday to Friday, 8:00 AM to 4:00 PM and provide access to resources and services for seniors (City of Marion, n.d.). Details about the Marion Senior Center's transportation services include but not limited to: (a) serve age 60 and older who seek help for transportation appointments in Marion County and out-of-county travels; (b) transportation services are available 8:00 AM to 3:30 PM, Monday to Friday; (c) transportation was handicap-accessible; and (d) access to transportation is by donation (City of Marion, n.d.).
- **Marion Area Transit (MAT)** – a public service transportation service in the City of Marion that provides curb to curb demand response. The City of Marion operates the Marion Area Transit with funding provided by the Ohio Department of Transportation and the federal Transit Administration. The Marion Area Transit offers demand service (Monday to Friday 8:00 AM to 4:00 PM and enhanced service with 24-hour notice needed. Transportation is provided countywide or majority of Ohio Counties with advance notice (City of Marion, Ohio, n.d.).
- **Marion City/County Regional Planning** – addresses land use and economic development agency in Marion County to ensure growth and progress. The Marion City/County Regional Planning Commission employs effective planning and coordination between the private and public sectors and government agencies related to transportation, recreation, land use, conservation of natural resources, and rehabilitation and redevelopment of existing urban areas (Marion County, Ohio, 2024). Related to transportation, the Marion City/County Regional Planning has developed strategies and goals to address transportation needs in Marion County. See **Appendix Table 138**.
- **Marion County Council on Aging** – enables services for seniors by awarding annual contracts to local organizations and service providers to support Marion County older adults age 60 and older. Through contract with the Marion Senior Center, the Marion County Council on Aging provides transportation services on a donation basis.
- **Marion County Job and Family Services** – offers Marion County residents with Medicaid insurance with Medical Non-Emergency Transportation (NET) with transportation to and from medical appointments. Residents are given transportation benefits such as (a) Marion Area Transit bus passes; (b) fuel cards; or (c) access to contracted vehicles to determine the most economical meals to provide transportation services to patients, families and caregivers (Marion County Job and Family Services, 2003-2024).

**Appendix Table 138. Summary of Marion City/County Regional Planning Commission's goals, strategies, and actions to promote access to transportation in Marion County (Crawford County, Marion County, and Morrow County, 2022).**

Marion County Priority Transportation Needs	Marion County Goals related to Transportation	Marion City/County Regional Planning Strategies and Actions related to Transportation
Expand transit service in Marion County.	Expand public transportation service to countywide service	<ul style="list-style-type: none"> <li>+ Use community survey coordination survey results related to countywide transportation.</li> <li>+ Analyze the difference between city and county residents and how residents responded differently.</li> <li>+ Apply for a Transit Feasibility Study through the Ohio Department of Transportation to gather data and needs.</li> <li>+ Seek letters of support from coordination partners, local organizations, businesses and community leaders.</li> <li>+ Design Transit Feasibility Study.</li> <li>+ Design transit service based on community stakeholder input, survey results, and peer system designs.</li> </ul>
Implement and improve on active transportation.	Define and review the Active Transportation Plan to improve walking and biking opportunities in Marion County	<ul style="list-style-type: none"> <li>+ Work with local leaders on the implementation of an Active Transportation Plan</li> <li>+ Administer evaluation survey to local stakeholders to assess their knowledge of the Active Transportation Plan.</li> <li>+ Improve bicycle infrastructure within Marion County.</li> <li>+ Implement a Safe Routes to School Plan.</li> </ul>
Implement and improve on active transportation.	<p>Increase alternative transportation options for Marion County such as taxi service, Uber or Lyft</p> <p>Create an awareness campaign regarding existing transportation and mobility opportunities.</p>	<ul style="list-style-type: none"> <li>+ Educate the public on available transportation services to address many residents are unaware to current mobility opportunities.</li> <li>+ Create a social media campaign in Marion County to share the mobility and transportation information to Marion County residents.</li> <li>+ Create printed items that can be distributed to the public highlighting the mobility options in Marion County.</li> <li>+ Create a detailed list of transportation services for Marion County.</li> <li>+ Attend local fairs, festivals, and events, to promote transportation and mobility options.</li> </ul>

**AC –3. Continue to provide access to transportation assistance** — Continue to provide one-way or round-trip transportation assistance (taxicab vouchers) to patients, families, and caregivers. The OhioHealth Foundation will continue to fund expenses for transportation assistance to patients, caregivers, and families served by the OhioHealth Marion General Hospital.

### OhioHealth Marion General Hospital’s Impacts Related to AC – 3 (Continue to provide access to transportation assistance).

**Appendix Table 139** shows the number of taxi or contracted rides financed by the OhioHealth Marion General Hospital and corresponding amount spent for patients needing transportation assistance in Fiscal Years 2023 and 2024.

**Appendix Table 140 and 141** show the number of patients served by Marion General Hospital who needed assistance related to transportation. The social worker or the Case Management team educates the patients, caregivers, and family members regarding availability of transportation assistance through the patient's health insurance, the Marion Senior Center, the Marion Area Transit, and other programs of the CMM Mobility project. Following a needs-based assessment, the OhioHealth Case Management team has also provided taxi rides and access to other means of transportation paid through OhioHealth funds. See details in **Appendix Table 138**.

**Appendix Table 139. Summary of number of rides and amount of transportation assistance that were provided to OhioHealth Marion General Hospital patients in Fiscal Years 2023 (7/1/2022 to 6/30/2023) and Fiscal Years 2024 (7/1/2023 to 6/30/2024).**

OhioHealth Facility	Count of Rides for Patients paid by OhioHealth Marion General Hospital (Fiscal Year 2023)	Cost of Rides for Patients paid by OhioHealth Marion General Hospital (Fiscal Year 2023)	Count of Rides for Patients paid by OhioHealth Marion General Hospital (Fiscal Year 2024)	Cost of Rides for Patients paid by OhioHealth Marion General Hospital (Fiscal Year 2024)
OhioHealth Marion General Hospital	567 rides	\$16,691.40	637 rides	\$39,977.55

**Appendix Table 140. Summary of count and percent of patients admitted in Fiscal Year 2023 (7/1/2022 to 6/30/2023) by the OhioHealth Marion General Hospital who reported transportation needs. In Fiscal Year 2023, Marion General Hospital assessed transportation needs among 3,511 patients out of 8,820 admitted patients (39.8%).**

	Count of Patients Assessed for Transportation Needs	Percent of Patients Assessed for Transportation Needs (N=3,511 patients)
No Transportation Needs	3119 patients	88.80%

- SDH – 4. Continue providing internships for business students —** Continue to offer internships to business students from Marion Technical College and The Ohio State University Marion.
- SDH – 5. Continue OhioHealth partnerships with Strayer University’s “Grads to Work” program —** Continue to offer the “Grads to Work” program, a partnership between OhioHealth and Strategic Education, Inc. where high school students from underserved populations who works for OhioHealth full time will be able to study for free at Strayer University without any out-of-pocket costs.

### **OhioHealth Marion General Hospital’s Impacts related to SDH-4 (Continue providing internships for business students) and SHD-5 (Continue providing internships for business students)**

In Fiscal Years 2023 and 2024, OhioHealth Marion General Hospital did not have any business interns from Marion Technical College or The Ohio State University Marion. However, representatives from the OhioHealth Marion General Hospital held events and gave talks to high school students regarding employment opportunities at OhioHealth Marion General Hospital and other OhioHealth facilities in Marion County. Moreover, the OhioHealth representatives also hosted Lunch and Learn about the opportunities in pursuing various healthcare careers. See **Appendix Table 146**.

**Appendix Table 146. Summary of OhioHealth Marion General Hospital's partnerships in Fiscal Year 2023 (7/1/2022 to 6/30/2023) and Fiscal Year 2024 (7/1/2023 to 6/30/2024) with school districts to empower high school youth in pursuing health care careers and considering work opportunities at the Hospital and other OhioHealth facilities.**

Date	School Partnered	Activity or Event Held	Goal of Partnerships	Number of Students or Persons Served

- SDH – 6. Continue OhioHealth involvement in the Marion Area Chamber of Commerce —** OhioHealth's senior advisor of business development represents OhioHealth Marion General Hospital in the Marion Area Chamber of Commerce. Examples of programs and services of the Marion Area Chamber of Commerce that address social determinants of health in Marion County include (but not limited to):
- SDH – 6.1.** Participation in the Marion Area Workforce Acceleration Collaborative (MAWAC) along with Job and Family Services, Marion CanDo, and every Marion County local school district and higher education academic institutions to act as School's Business Advisory Council to help address the workforce needs of our business community.
  - SDH – 6.2.** Membership in the Made in Marion Expo created to help 7<sup>th</sup> and 9<sup>th</sup> grade students from every school district so they could experience and learn manufacturing initiatives in Marion County.
  - SDH – 6.3.** Initiated and continuation of the first Workforce Summit at The Ohio State University at Marion in December 2019. The summit brought together educators and businesses together along with a student panel to talk about workforce challenges and solutions.
  - SDH – 6.4.** Assists member businesses in retaining and educating their workforce.
  - SDH – 6.5.** Hosts regular educational speaker presentations for manufacturers, human resources, entrepreneurship, non-profit executives, and Safety Council that help our member employees continue education, build skills and develop their workforce.
  - SDH – 6.6.** Provide 6-week supervisor leadership training workshop annually.
  - SDH – 6.7.** Provide Occupational Safety and Health Administration (OSHA) general industry training.
  - SDH – 6.8.** Provide Society for Human Resources Management (SHRM) certified training sessions
  - SDH – 6.9.** Collaborate closely with Marion County Job & Family Services, Marion Technical College, The Ohio State University at Marion, Tri-Rivers Career Center to help connect businesses to community resources so they can hire competent workforce, provide ongoing training and education, and help employees build skills and competencies.
  - SDH – 6.10.** Host monthly meetings related to current trends in manufacturing, human resources, safety, executive roles and entrepreneurship
  - SDH – 6.11.** Partners with Marion County Job and Family Services in co-sponsoring the annual job fair.
  - SDH – 6.12.** Co-sponsors specialized educational programs and workshops such as cyber security.

## OhioHealth Marion General Hospital's Impacts related to SDH 6 – Continue OhioHealth involvement in the Marion Area Chamber of Commerce

**Appendix Table 147** shows the OhioHealth participation to various activities of the Marion Area Chamber of Commerce and the Marion Area Workforce Acceleration Committee. In Fiscal Year 2023, the Senior Advisor of Business Development participated in various meetings and initiatives led by the Marion Area Chamber of Commerce and the Marion Area Workforce Acceleration Committee. The Marion Area Chamber of Commerce is an association of businesses that provides leadership for the improvement of the economic prosperity and quality of life of the Marion area. On the other hand, the Marion Area Workforce Acceleration Committee provides the next generation with an integrated opportunity to develop professional skills by combining education with industry. The Marion Area Workforce Acceleration Committee partners with various Marion County's leaders of educational, business and workforce development organizations to offer local students with job opportunities.
